

Ultra-Large band Silicon Capacitor ULSC 0201 47nF BV11

Rev. 2.00

General description

ULSC Capacitor targets Optical communication system such as ROSA/TOSA, SONET and all optoelectronics as well as High speed data system or products.

The ULSC is suitable for DC blocking, feedback, coupling and bypassing applications in all broadband optoelectronics and High-speed data system.

The unique technology of integrated passive device in silicon, developed by Murata Integrated Passive Solutions, offers unique performances with low insertion loss, low reflection and phase stability from 34 KHz to 20 GHz.

These capacitors in ultra-deep trenches in silicon have been developed in a semiconductor process, in order to integrate trench MOS capacitor providing high capacitance value of 47 nF (for kHz–MHz range) and high frequency MIM capacitors for low capacitance value for GHz range), combined in a 0201 [0.8x0.6mm] case.

The ULSC capacitor provides very high stability of the capacitance over temperature, voltage variation as well as a very high reliability.

ULSC capacitors have an extended operating temperature ranging from -55 to 150°C, with very low capacitance change over temperature.

Assembly: Suitable for surface mounted application on rigid PCB, ceramic substrate, FR4 (laminated) or flex platforms.

Bump finishing: ENIG

Copper pads optional for embedding version and SAC305 type 6 for pre-bumping version, as an optional finishing.

Key features

- Ultra-Large band performance up to 20 GHz
- Resonance free
- Phase stability
- Insertion loss < 0.2dB Typ. up to 20 GHz
- Ultra-high stability of capacitance value:
 - Temperature 70ppm/K (-55 °C to +150 °C)
 - Voltage <-0.1%/Volt
 - Negligible capacitance loss through ageing
- Low profile: 400µm, 100 µm on request
- Break down voltage : 11V
- Low leakage current < 100pA
- High reliability
- High operating temperature (up to 150 °C)
- Compatible with high temperature cycling during manufacturing operations (exceeding 300 °C)
- Compatible with EIA 0201 footprint

Key applications

- ROSA/TOSA
- SONET
- High speed digital logic
- Microwave/millimetre system
- High volumetric efficiency (*i.e. capacitance per unit volume*)
- Broadband test equipment

Pad Metallization

The Surface Mounted Capacitor is delivered as standard with NiAu finishing [ENIG].

Other Metallization, such as SAC305, Copper, Thick Gold or Aluminum pads are possible on request.

Silicon dies are not sensitive to humidity, please refer to applications notes 'Assembly Notes' section 'Handling precautions and storage'.

Material regulation

This product is RoHS compliant at the time of publication. For further information about regulation compliancy, please ask your sales representative.

Assembly

ULSC series is compatible with standard reflow technology.

It is recommended to design mirror pads on the PCB.

For further information, please see our mounting application note.

The attachment techniques recommended by Murata on the customer's substrates are fully detailed in specific documents available on our website. To assure the correct use and proper functioning of Murata capacitors **please download the assembly instructions on <https://www.murata.com/en-us/products/capacitor/siliconcapacitors> and read them carefully.**
