

## **PI3EQX8908A1**

2.5Gbps/5.0Gbps/8.0Gbps 8-channel PCI Express ReDriver™ with Linear Equalization

## **Description**

Diodes' PI3EQX8908A1 is a PCle, 8 differential channels Re-Driver™. The device provides programmable linear equalization, output swing and gain, by either pin strapping option or I²C Control, to optimize performance over a variety of physical mediums by reducing Inter-symbol interference.

The PI3EQX8908A1 supports eight 100-Ohm Differential CML data I/O's and extends the signals across other distant data pathways on the user's platform.

The programmable settings can be applied easily via pins or software (I<sup>2</sup>C).

The PI3EQX8908A1 offers fully Linear Transfer function to fully comply with all PCIe 3 Link Training signals.

## **Features**

- → 2.5/5.0/8.0Gbps serial link with linear equalizer
- → Support PCIe Gen 1/2/3 protocol
- → Supporting 8 differential channels
- → Independent channel configuration of receiver equalization, output swing and flat gain
- → Per Channel Activity Detector with selectable input termination between 50Ω to V<sub>DD</sub> and 200KΩ to V<sub>DD</sub>
- Per Channel Output Termination Detector on power up with selectable output termination between 50Ω to V<sub>DD</sub> and High impedance
- → Very linear transfer function
- → Fully compliant to PCISIG Link Training
- → Single-ended mode receiver detection for PCIe
- → Input Threshold detection
- → Pin strap and I<sup>2</sup>C slave selectable device programming
- → 4-bit selectable address bit for I<sup>2</sup>C
- → Supply Voltage: 3.3V±0.3V
- → Industrial Temperature Range: -40°C to 85°C
- → Packaging (Pb-free & Green):
  - 54-contact TQFN (10mm x 5.5mm x 0.5mm pitch)
    - flowthrough pinout
