### Description

Thanks to a junction temperature  $T_j$  up to  $150 \text{ }^\circ\text{C}$  and a non-isolated TO-220 package, the **TN1610H-6T** offers high thermal performance operation up to 16 A rms.

The trade-off between the device's noise immunity ( $dV/dt = 1 \text{ kV}/\mu\text{s}$ ), its gate triggering current ( $I_{GT} = 10 \text{ mA}$ ) and its turn-on current rise ( $dl/dt = 100 \text{ A}/\mu\text{s}$ ) allows the design of robust and compact control circuits for voltage regulators in motorbikes and industrial drives, overvoltage crowbar protection, motor control circuits in power tools and kitchen appliances and inrush current limiting circuits.
