

# ZXTN25020DFL 20V, SOT23, NPN low power transistor

### **Summary**

 $BV_{CEX} > 100V$   $BV_{CEO} > 20V$   $BV_{ECO} > 5V$   $I_{C(cont)} = 2A$   $I_{CM} = 8A$   $V_{CE(sat)} < 70mV @ 1A$   $R_{CE(sat)} = 55m\Omega$   $P_{D} = 350mW$ Complementary part nur

#### Complementary part number ZXTP25020DFL

### Description

Advanced process capability has been used to achieve high current gain hold up making this device ideal for applications requiring high pulse currents.

#### Features

- High peak current
- · Low saturation voltage
- 100V forward blocking voltage

#### **Applications**

- MOSFET and IGBT gate driving
- DC-DC conversion
- LED driving
- Interface between low voltage IC's and loads

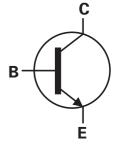

### **Ordering information**

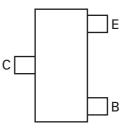

| Device         | Reel size<br>(inches) | Tape width<br>(mm) | Quantity per reel |
|----------------|-----------------------|--------------------|-------------------|
| ZXTN25020DFLTA | 7                     | 8                  | 3,000             |

#### **Device marking**

1A1

**Issue 4 - January 2007** © Zetex Semiconductors plc 2007

### Absolute maximum ratings

| Parameter  | Symbol                            | Limit      | Unit  |
|--|-----------------------------------|------------|-------|
| Collector-base voltage                                     | V <sub>CBO</sub>                  | 100        | V     |
| Collector-emitter voltage (forward blocking)               | V <sub>CEX</sub>                  | 100        | V     |
| Collector-emitter voltage                                  | V <sub>CEO</sub>                  | 20         | V     |
| Emitter-collector voltage (reverse blocking)               | V <sub>ECO</sub>                  | 5          | V     |
| Emitter-base voltage                                       | V <sub>EBO</sub>                  | 7          | V     |
| Continuous collector current <sup>(a)</sup>                | Ι <sub>C</sub>                    | 2          | А     |
| Base current   | Ι <sub>Β</sub>                    | 500        | mA    |
| Peak pulse current   | I <sub>CM</sub>                   | 8          | А     |
| Power dissipation at T <sub>amb</sub> =25°C <sup>(a)</sup> | P <sub>D</sub>                    | 350        | mW    |
| Linear derating factor                                     |                                   | 2.8        | mW/°C |
| Operating and storage temperature range                    | T <sub>j</sub> , T <sub>stg</sub> | -55 to 150 | °C    |

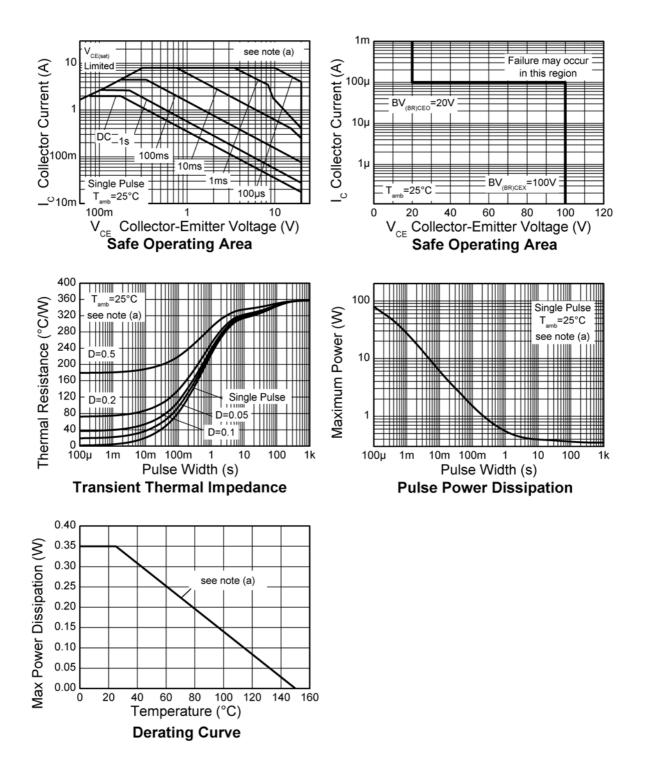

### **Thermal resistance**

| Parameter                          | Symbol         | Limit | Unit |  |
|------------------------------------|----------------|-------|------|--|
| Junction to ambient <sup>(a)</sup> | $R_{\ThetaJA}$ | 357   | °C/W |  |

NOTES:

(a) For a device surface mounted on 25mm x 25mm x 1.6mm FR4 PCB with high coverage of single sided 1oz copper, in still air conditions.

### **Characteristics**

| Parameter   | Symbol               | Min. | Тур. | Max.     | Unit     | Conditions  |

Note: Controlling dimensions are in millimeters. Approximate dimensions are provided in inches

Zetex Semiconductors does not warrant or accept any liability whatsoever in respect of any parts purchased through unauthorized sales channels.

#### ESD (Electrostatic discharge)

Semiconductor devices are susceptible to damage by ESD. Suitable precautions should be taken when handling and transporting devices. The possible damage to devices depends on the circumstances of the handling and transporting, and the nature of the device. The extent of damage can vary from immediate functional or parametric malfunction to degradation of function or performance in use over time. Devices suspected of being affected should be replaced.

#### Green compliance

Zetex Semiconductors is committed to environmental excellence in all aspects of its operations which includes meeting or exceeding regulatory requirements with respect to the use of hazardous substances. Numerous successful programs have been implemented to reduce the use of hazardous substances and/or emissions.

| All Zetex components are compliant with the RoHS directive, and through this it is supporting its customers in their compliance wi | th |
|--|----|
| WEEE and ELV directives.   |    |

| Product status key:               |   |
|-----------------------------------|---|
| "Preview"                         | Future device intended for production at some point. Samples may be available   |
| "Active"                          | Product status recommended for new designs  |
| "Last time buy (LTB)"             | Device will be discontinued and last time buy period and delivery is in effect  |
| "Not recommended for new designs" | Device is still in production to support existing designs and production  |
| "Obsolete"                        | Production has been discontinued  |
| Datasheet status key:             |   |
| "Draft version"                   | This term denotes a very early datasheet version and contains highly provisional information, which may change in any manner without notice.  |
| "Provisional version"             | This term denotes a pre-release datasheet. It provides a clear indication of anticipated performance. However, changes to the test conditions and specifications may occur, at any time and without notice. |
| "lssue"                           | This term denotes an issued datasheet containing finalized specifications. However, changes to specifications may occur, at any time and without notice.  |
