

## 3.3V HCSL Low Jitter 100MHz PCIe® 2.0 XO

## SQPCIE100

5.0 x 3.2mm Ceramic SMD

## ASSP XO™ for Networking

### Product Features

- Provides 100 MHz HCSL output for interfacing to standard PCIe® devices
- Very low PCIe 2.0 jitter - 1.8ps RMS (typ.)
- Thicker crystal for improved reliability
- Pb-free & RoHS compliant
- Industrial temperature range

### Product Description

The SQPCIE100 3.3V crystal clock oscillator achieves superb jitter for PCIe® 1.0 & 2.0 applications. The output clock signal, generated internally with a patented oscillator design, is compatible with HCSL logic levels. The device, available on tape and reel, is contained in a 5.0 x 3.2mm surface-mount ceramic package.

### Applications

- Server
- Network Switch/Router
- Telecom Switch
- Media Box
- Graphics Card
- Host Bus Adapter

### Package:

### Recommended Land Pattern:

### Pin Functions:

| Pin | Function                |
|-----|-------------------------|
| 1   | OE Function             |
| 2   | N/C                     |
| 3   | V <sub>EE</sub>         |
| 4   | OUT                     |
| 5   | $\overline{\text{OUT}}$ |
| 6   | V <sub>CC</sub>         |

\*Extended high frequency power decoupling is recommended (see test circuit for minimum recommendation). To ensure optimal performance, do not route RF traces beneath the package.

### Part Ordering Information:

| Jitter, pk-pk                   |                                                                  |      | 40   | ps    | 100,000 random periods                                                     |

### Notes:

- Stability includes all combinations of operating temperature, load changes, rated input (supply) voltage changes, initial calibration tolerance (25°C), aging (5 year at 40°C average effective ambient temperature), shock and vibration.
- For specifications other than those listed, please contact sales.

## Output Enable / Disable Function

| Parameter                                                 | Min.                | Typ. | Max.                | Units | Notes                    |
|-----------------------------------------------------------|---------------------|------|---------------------|-------|--------------------------|
| Input Voltage (pin 1), Output Enable                      | 0.7*V <sub>DD</sub> |      |                     | V     | or open                  |
| Input Voltage (pin 1), Output Disable (low power standby) |                     |      | 0.3*V <sub>DD</sub> | V     | Outputs disabled to Hi-Z |
| Output Disable Delay                                      |                     |      | 200                 | ns    |                          |
| Output Enable Delay                                       |                     |      | 2                   | ms    |                          |

## Absolute Maximum Ratings

| Parameter           | Min. | Typ. | Max. | Units | Notes |
|---------------------|------|------|------|-------|-------|
| Storage Temperature | -55  |      | +125 | °C    |       |
