

PI3WVR13412

DisplayPort 1.3/1.4, HDMI 2.0 Video Switch

Description

The PI3WVR13412 is a multi-standard video switch with wide voltage range capability. It supports DisplayPort 1.3/1.4, HDMI 2.0, and emerging and proprietary standard.

The PI3WVR13412 can pass high-speed signals up to 1.2 V peak-to-peak differential with a common-mode voltage from 0 to 3.4V for TMDS signal.

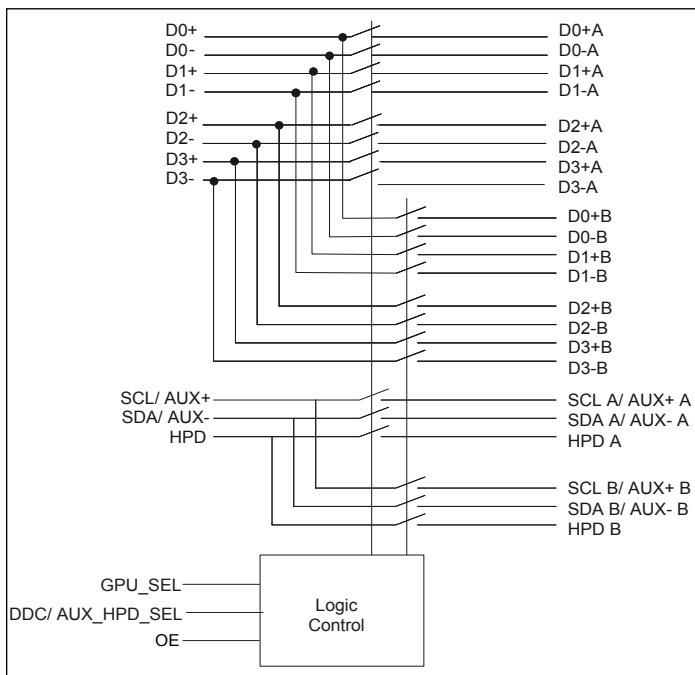

The wide voltage range allow DC-coupled multi-standard operation. Eliminating AC coupling capacitors saves board space and improves signal integrity for dense PCB design.

In addition to four high-speed lanes, PI3WVR13412 also switches the DDC and HPD signals or AUX and HPD signals using the DDC/ AUX and HPD channel mux/demux.

Applications

- Routing of DisplayPort video signals with low signal attenuation between source and sink for PC and monitor.
- Routing of HDMI 2.0 video signals with low signal attenuation between source and sink for 4K2K ultra high definition video display and broadcast video equipment.
