All parameters are ready to use, no scalling is necessary.

Package Equivalent Circuit:

The TSFP-4 package has two emitter leads. To avoid high complexity of the package equivalent circuit, both lead are combined in on electrical connection. $R_{\rm LxI}$ are series resistors for the inductance $L_{\rm XI}$ and $K_{\rm Xa-yb}$ are the coupling coefficients between the inductance $L_{\rm Xa}$ and $L_{\rm yb}$. The referencepins for the couple ports are B, E, C, B´, E`, C´.

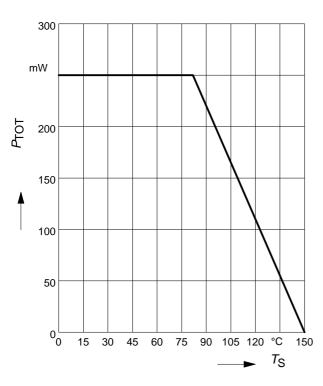

For examples and ready to use parameters please contact your local Infineon Technologies distributor or sales office to obtain a Infineon Technologies CD-ROM or see Internet: http://www.infineon.com/silicondiscretes
