1 Description

OptiMOS[™]30V products are class leading power MOSFETs for highest power density and energy efficient solutions. Ultra low gate- and output charges together with lowest on state resistance in small footprint packages make OptiMOS[™] 30V the best choice forthe demanding requirements of voltage regulator solutions in Servers, Datacom and Telecom applications. Super fast switching Control FETs together with low EMI Sync FETs provide solutions that are easy to design in. OptiMOS[™] products are available in high performance packages to tackle your most challenging applications giving full flexibility in optimizing space- efficiency and cost. OptiMOS[™] products are designed to meet and exceed the energy efficiency and power density requirements of the sharpened next generation voltage regulation standards in computing applications

Features

- Optimized for high switching frequency DC/DC converter
- 100% avalanche tested
- Very low on-resistance R_{DS(on)}
- Qualified according to JEDEC¹⁾ for target applications
- Excellent gate charge x R_{DS(on)} product (FOM)
- Pb-free plating; RoHS compliant
- Halogen-free according to IEC61249-2-21
- Double.sided cooling
- Compatible with DirectFET® package SQ footprint and outline
- 100% Rg Tested
- Low parasitic inductance
- Low profile (<0.7 mm)

Applications

- On board power for server
- Power managment for high performance computing
- Synchronous rectification
- High power density point of load converters
