

# STTH4R02

### Ultrafast recovery diode

#### **Features**

- Very low conduction losses
- Negligible switching losses
- Low forward and reverse recovery times
- High junction temperature

### **Description**

The STTH4R02 uses ST's new 200 V planar Pt doping technology, and it is specially suited for switching mode base drive and transistor circuits.

Packaged in TO-220AC, TO-220FPAC, DPAK, SMB, SMC, and DO-201AB, this device is intended for use in low voltage, high frequency inverters, free wheeling and polarity protection.
