

Universal digital multicell controller with PMBus™

VFQFPN68 8x8 mm

Features

- High performance resonant / non-resonant digital control loop STVCOT™
- Drives up to 6 cells with STPRDC01 and STPRDC02, from 50 W up to > 300 W
- Compliant with Intel VR13, VR13.HC and AVS protocols
- Fully configurable through PMBus™ rev1.2
 - Telemetry for primary and secondary
 - Full IC configuration / management
 - Voltage positioning
- Advanced power management
 - Auto cell shedding with PFM
 - Low power 1.8 V logic
- Programmable protections
 - OV / UV and FB disconnection
 - Analog and digital overcurrent protection (OCP)
 - Current sharing warning
 - Black box recorder (BBR)
 - Catastrophic fault precursor (CFP)
- Embedded non-volatile memory (NVM)
- Primary μ C interface for telemetry (PuC)
- Single-wire synchronous rectifier driver
- RST and EN1V8 for low power mode
- VFQFPN68, 8x8 mm package

Application

- High efficiency Step-Down conversion

Description

The **STPDDC60** is a high performance digital controller featuring the innovative and patented resonant / non-resonant ST VCOT™ control loop that allows to implement a high efficiency DC-DC converter in single-stage conversion directly from the 60 V bus.

In combination with STPRDC01 and STPRDC02, the device is able to implement a scalable power supply with output power ranging from 50 W up to >300 W featuring Auto Cell Shedding and PFM to optimize the overall efficiency maintaining a >90% baseline over the whole current range without compromising the load transient and DVID response.

The **STPDDC60** can be fully configured through PMBus™ to minimize external component count. Full set of telemetry is provided including BBR, CFP and primary / secondary side telemetry.

The device assures fast and independent protection against overcurrent, over/under-voltage and FB disconnection.

The **STPDDC60** is available in VFQFPN68, 8x8 mm package with exposed pad.

Product status	
STPDDC60	
Product summary	
Order code	STPDDC60TR
Package	VFQFPN68
Packing	Tape & Reel
