

# STPS50U100C

## ULVF™ power Schottky rectifier

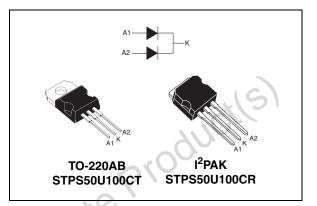

## Features

- ultralow forward voltage drop
- high current capability
- high frequency operation

## Description

The STPS50U100C is a dual power Schottky diode rectifier, suited for high frequency switch mode power supplies.

Featuring an ultralow forward voltage (ULVF) drop, this device, packaged in TO-220AB and I<sup>2</sup>PAK, is intended to be used in notebook, game station and desktop adaptors as well as server SMPS. It has been especially designed to help power supply manufacturers meet the recently introduced worldwide efficiency standards.

## Table 1. Device summary

| Symbol                               | Value    |
|--------------------------------------|----------|
| I <sub>F(AV)</sub>                   | 2 x 25 A |
| V <sub>RRM</sub>                     | 100 V    |
| V <sub>F</sub> (typ) (25 A @ 125 °C) | 0.64 V   |
| T <sub>j</sub> (max)                 | 150 °C   |

| Application information   |

Figure 7. Forward voltage drop versus forward current (per diode)

### **Application information** 2

It is mandatory to ensure a peak reverse voltage below the  $V_{\rm RRM}$  absolute rating. ST recommends the use of an RC clamping snubber circuit in parallel with the STPS50U100C device.

## 3 Package information

- Epoxy meets UL94,V0
- Cooling method: by conduction (C)
- Recommended torque value: 0.4 to 0.6 N·m

In order to meet environmental requirements, ST offers these devices in different grades of ECOPACK<sup>®</sup> packages, depending on their level of environmental compliance. ECOPACK<sup>®</sup> specifications, grade definitions and product status are available at: <u>www.st.com</u>. ECOPACK<sup>®</sup> is an ST trademark.
