Ballistix Tactical 4GB DDR3-1600 UDIMM VLP product information

Product Specifications

Brand	Ballistix
Form Factor	UDIMM
Total Capacity	4GB
Warranty	Limited Lifetime
Specs	DDR3 PC3-12800 • 8-8-8-24 • Unbuffered • NON-ECC • DDR3-1600 • 1.35V • 512Meg x 64 • Low Profile •
Series	Ballistix Tactical
ECC	NON-ECC
Module Qty	1
Speed	1600 MT/S
Tracer	False

we take care of our customers

Product Specifications

Voltage 1.35V

DIMM Type Unbuffered

Bullet Features Designed for performance enthusiasts, gamers and power users

About Me Casual User

PROS	CONS	BEST USES
Easy To Install		Increased Performance
Fast		Multimedia
Reliable		Multiple desktop applications
Performance		

Comments about *Crucial 4GB Ballistix 240-pin DIMM DDR3 PC3-12800*:

I ordered two modules and discovered on receipt that one of my slots had a fault therefor I could only use one of the modules. I returned it with absolutely no hassle and my payment was refunded without any quibble. I have dealt with Crucial a number of times and their service is second to none.

PRIMARY USE: Personal

BOTTOM LINE Yes, I would recommend this to a friend

Comments about *Crucial 4GB Ballistix 240-pin DIMM DDR3 PC3-12800*:

My Asus mobo BIOS failed to Auto-detect (1) the Clock rate, setting it at 1066: I had to fix it manually to 1600, (2) the Timings which were 8-8-8-20 and I had to fix manually to the specs 8-8-8-24.

Finally, the Command Rate was auto-detected at 1N, but an online-published review of the product stated that the testing item was marked 2T(2N). The reviewer found it however that the product performed very reliably at 1N with a small edge in speed. I decided to leave it at 1N and after a week have found no RAM issues whatsoever. However, it would have been better to read this detail in the Manual rather than finding it online.

I tested the RAM speed with MaxMEMM2 and the increase in speed w.r.t. my previous DDR3-1066 RAM is as expected: Clock +50%, Write +40%, Read +28%, Latency +24%. 3DMark11 as expected did not report any improvement in GPU-intensive tests, but in the CPU-intensive Test 5 reported an increase of 12%. I am very happy with these results.

PRIMARY USE: Entertainment

BOTTOM LINE Yes, I would recommend this to a friend
