ECC	NON-ECC
Kit Qty	2
Speed	1066 MT/S
Tracer	False
Voltage	1.5V
DIMM Type	Unbuffered
Bullet Features	Increases system performance

### More information

## SODIMM de 204 pines para Mac

En resumen, los módulos de memoria dual en línea de contorno pequeño de 204 pines (SODIMM) son el factor de forma utilizado para proporcionar módulos de memoria DDR3 para equipos portátiles y otras plataformas informáticas con factor de forma pequeño.

Para utilizar la memoria DDR3, su sistema debe tener una ranura SODIMM de 204 pines y un conjunto de chips que admita la memoria DDR3. Un DDR3 SODIMM no encaja en los receptáculos de memoria DDR2 o DDR.

Los SODIMM son más pequeños y delgados que los DIMM normales, y las tarjetas de circuito impreso SODIMM de 204 pines siempre tienen aprox. 2,6 pulgadas de largo y generalmente miden aprox. 1,18 pulgadas (aunque la altura puede variar ligeramente). Cuentan con varios componentes de memoria (generalmente negros) conectados a una tarjeta de circuito impreso (generalmente verde). La cantidad de componentes de memoria en una tarjeta de circuito impreso (PCB) de 204 pines SODIMM puede variar, pero la PCB siempre tendrá 102 pines en la parte frontal y posterior, para un total de 204 pines. Los pines dorados de la parte inferior de la SODIMM proporcionan la conexión entre el módulo de memoria y el receptáculo de memoria.

### Review

I'd buy this all over again.

The memory was easy to install (once I'd found a screwdriver small enough to unscrew the case - You'll need a really small phillips for this mac, but they're cheap and easy enough to...

★★★★★ 5.0 Great product for my Mac

4/2/2016

PROS	CONS	BEST USES
Doubled Ram	None	Increase Ram On My Mac
Neat Packaging		

Prompt Delivery

**Comments about *Crucial 4GB kit (2GBx2) 204-pin SODIMM DDR3 PC3-8500:***

Recommended this product/company to increase my RAM - delivered in 2 days, so v. pleased - and put into my computer quickly. Speed has improved so much. Have had one or two blips (don't seem to be able to use Open Office to save/retrieve/open downloaded email attachments), but have got round that with Neo Office. Much quicker now to pick up bluetooth for photos/mouse etc.

**BOTTOM LINE** Yes, I would recommend this to a friend
