Please note: As part of the Fairchild Semiconductor integration, some of the Fairchild orderable part numbers will need to change in order to meet ON Semiconductor's system requirements. Since the ON Semiconductor product management systems do not have the ability to manage part nomenclature that utilizes an underscore (\_), the underscore (\_) in the Fairchild part numbers will be changed to a dash (-). This document may contain device numbers with an underscore (\_). Please check the ON Semiconductor website to verify the updated device numbers. The most current and up-to-date ordering information can be found at [www.onsemi.com](http://www.onsemi.com). Please email any questions regarding the system integration to [Fairchild\\_questions@onsemi.com](mailto:Fairchild_questions@onsemi.com).

# KA319

## Dual Comparator

### Features

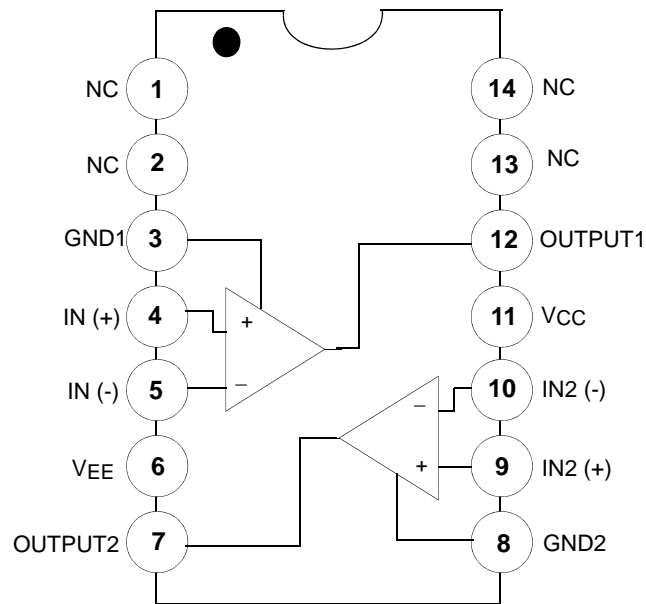

- Operates From a Single 5V Supply
- Typically 80ns Response Time at  $\pm 15V$
- Open Collector Outputs : up to +35V
- High Output Drive Current : 25mA
- Inputs and Outputs can be Isolated From System Ground
- Minimum Fan-out of 2 (Each Side)
- Two Independent Comparators

### Description

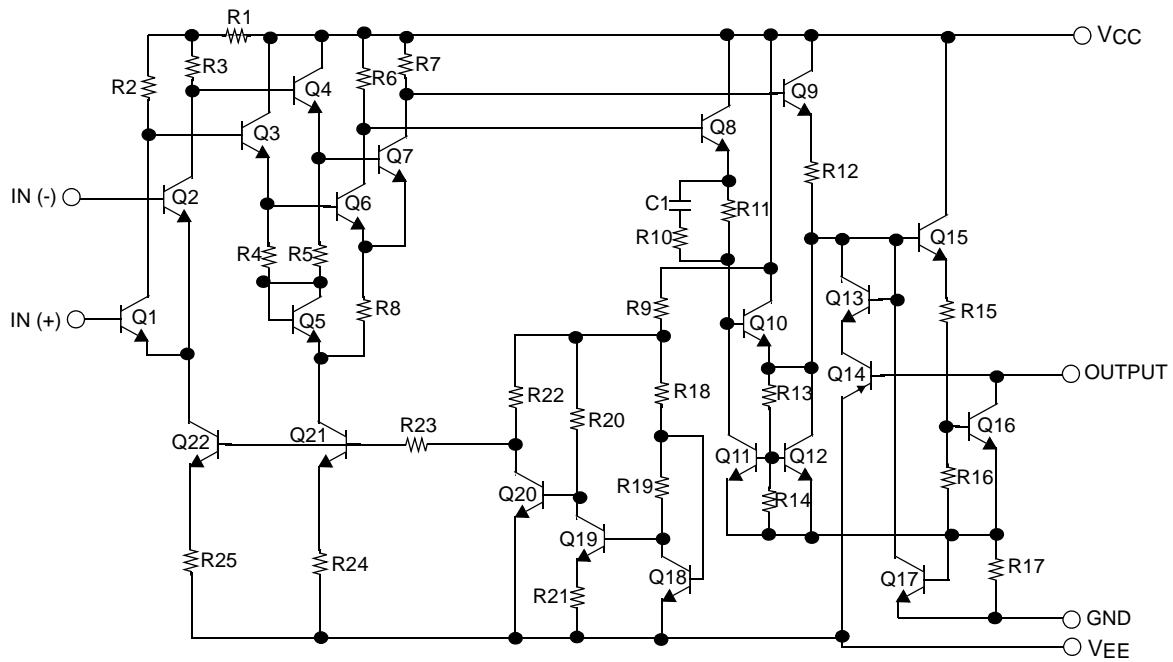

The KA319 is a dual high speed voltage comparator designed to operate from a single +5V supply up to  $\pm 15V$  dual supplies. Open collector of the output stage makes the KA319 compatible with RTL, DTL and TTL as well as capable of driving lamps and relays at currents up to 25mA. Typical response time of 80ns with  $\pm 15V$  power supplies makes the KA319 ideal for application in fast A/D converts, level shifters, oscillators, and multivibrators.

### Notes :

- The offset voltage and offset currents given are the maximum values required to drive the output within a volt of either supply with a 1mA load. Thus, these parameters define an error band and take into account the worst case effects of voltage gain and input impedance.
- The response time specified is for a 100mV input step with 5mV overdrive.
- KA319 :  $0 \leq T_A \leq +70^\circ C$
