Demo board description

LPCpresso™ is a new, low-cost development platform available from NXP supporting NXP's ARM-based microcontrollers. The platform is comprised of a simplified Eclipse-based IDE and low-cost target boards which include an attached JTAG debugger. LPCpresso™ is an end-to-end solution enabling engineers to develop their applications from initial evaluation to final production.

The LPCpresso™ LPC1343 is discontinued and replaced by the LPCpresso™ LPC1347 (order number OM13045)
