KITMPL115A1EVB Quick Start Guide

STEP 1

Unpack the board. Verify package contents according to the kit Web site: www.freescale.com/sensortoolbox

Assemble the hardware by connecting a development board to the interface board. This board is intended for use with a pressure sensor interface board, purchased separately. More information can be found on the Web site.

STEP 2

At www.freescale.com/sensortoolbox download the latest software version by clicking the link. Download Software
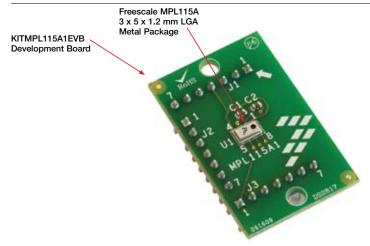

All Sensor Toolbox kits use the same software and driver, so the install only needs to be done once. Follow the on-screen instructions to install the communication driver for the tool. Check back occasionally for software updates.

STEP 3

Plug in the USB and turn the board on using the power switch. Run the Sensor Toolbox link on your desktop.
