

1 Form A Solid-State Relay (Normally Open)

DESCRIPTION

The LH1510 is an SPST normally open switch (1 Form A) that can replace electromechanical relays in many applications. The relay is constructed using a GaAlAs LED for actuation control and high reliable MOSFETs for the output switch. In addition, it employs current-limiting circuitry to provide overvoltage protection. The LH1510 provides current limiting also for unidirectional DC applications.

FEATURES

- Isolation test voltage 5300 V_{RMS}
- Typical R_{ON} 12 Ω
- Load voltage 200 V
- Load current 200 mA / 350 mA
- Clean bounce free switching
- Current limit protection
- Low power consumption
- Material categorization: for definitions of compliance please see www.vishay.com/doc?99912

APPLICATIONS

- General telecom switching
- Metering
- Security equipment
- Instrumentation
- Industrial controls
- Battery management systems
- Automatic test equipment

AGENCY APPROVALS

- UL1577, file no. E52744

Note

- Stresses in excess of the absolute maximum ratings can cause permanent damage to the device. Functional operation of the device is not implied at these or any other conditions in excess of those given in the operational sections of this document. Exposure to absolute maximum ratings for extended periods of the time can adversely affect reliability
