

## Improved Quad SPST CMOS Analog Switches

#### DESCRIPTION

The DG441B, DG442B are monolithic guad analog switches designed to provide high speed, low error switching of analog and audio signals. The DG441B, DG442B are upgrades to the original DG441, DG442.

Combing low on-resistance (45  $\Omega$ , typ.) with high speed (t<sub>ON</sub> 120 ns, typ.), the DG441B, DG442B are ideally suited for Data Acquisition, Communication Systems, Automatic Test Equipment, or Medical Instrumentation. Charge injection has been minimized on the drain for use in sample-and-hold circuits.

The DG441B, DG442B are built using Vishay Siliconix's high-voltage silicon-gate process. An epitaxial layer prevents latchup.

When on, each switch conducts equally well in both directions and blocks input voltages to the supply levels when off.

#### **FEATURES**

- Low On-Resistance: 45  $\Omega$
- Low Power Consumption: 1 mW
- Fast Switching Action t<sub>ON</sub>: 120 ns
- Low Charge Injection Q: 1 pC
- TTL/CMOS-Compatible Logic
- Single Supply Capability
- Material categorization: For definitions of compliance please see www.vishay.com/doc?99912

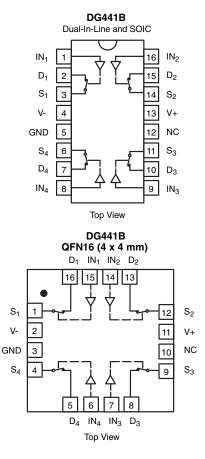

#### BENEFITS

- Less Signal Errors and Distortion
- **Reduced Power Supply Requirements**
- Faster Throughput
- **Reduced Pedestal Errors**
- Simple Interfacing

#### **APPLICATIONS**

- Audio Switching
- Data Acquisition •
- Sample-and-Hold Circuits
- **Communication Systems**
- Automatic Test Equipment
- Medical Instruments

Notes:

a. Signals on S<sub>X</sub>, D<sub>X</sub>, or IN<sub>X</sub> exceeding V+ or V- will be clamped by internal diodes. Limit forward diode current to maximum current ratings.

b. All leads welded or soldered to PC Board.

c. Derate 6 mW/°C above 75 °C.

d. Derate 12 mW/°C above 75 °C.

Notes:

a. Refer to PROCESS OPTION FLOWCHART.

b. Room = 25 °C, Full = as determined by the operating temperature suffix.

c. Typical values are for DESIGN AID ONLY, not guaranteed nor subject to production testing.

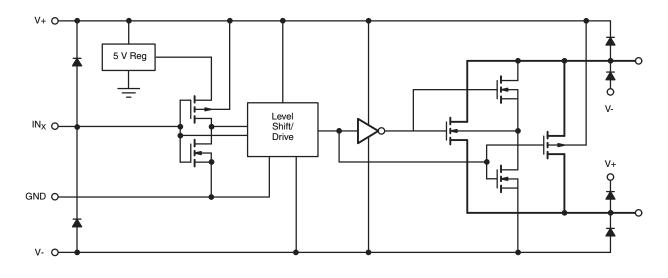

d. The algebraic convention whereby the most negative value is a minimum and the most positive a maximum, is used in this data sheet.

e. Guaranteed by design, not subject to production test.

f. V<sub>IN</sub> = input voltage to perform proper function.

Stresses beyond those listed under "Absolute Maximum Ratings" may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated in the operational sections of the specifications is not implied. Exposure to absolute maximum rating conditions for extended periods may affect device reliability.

#### Notes

<sup>(1)</sup> Use millimeters as the primary measurement.

<sup>(2)</sup> Dimensioning and tolerances conform to ASME Y14.5M. - 1994.

<sup>(3)</sup> N is the number of terminals. Nd and Ne is the number of terminals in each D and E site respectively.

<sup>(4)</sup> Dimensions b applies to plated terminal and is measured between 0.15 mm and 0.30 mm from terminal tip.

<sup>(5)</sup> The pin 1 identifier must be existed on the top surface of the package by using identification mark or other feature of package body.

<sup>(6)</sup> Package warpage max. 0.05 mm.

## Disclaimer

ALL PRODUCT, PRODUCT SPECIFICATIONS AND DATA ARE SUBJECT TO CHANGE WITHOUT NOTICE TO IMPROVE RELIABILITY, FUNCTION OR DESIGN OR OTHERWISE.

Vishay Intertechnology, Inc., its affiliates, agents, and employees, and all persons acting on its or their behalf (collectively, "Vishay"), disclaim any and all liability for any errors, inaccuracies or incompleteness contained in any datasheet or in any other disclosure relating to any product.

Vishay makes no warranty, representation or guarantee regarding the suitability of the products for any particular purpose or the continuing production of any product. To the maximum extent permitted by applicable law, Vishay disclaims (i) any and all liability arising out of the application or use of any product, (ii) any and all liability, including without limitation special, consequential or incidental damages, and (iii) any and all implied warranties, including warranties of fitness for particular purpose, non-infringement and merchantability.

Statements regarding the suitability of products for certain types of applications are based on Vishay's knowledge of typical requirements that are often placed on Vishay products in generic applications. Such statements are not binding statements about the suitability of products for a particular application. It is the customer's responsibility to validate that a particular product with the properties described in the product specification is suitable for use in a particular application. Parameters provided in datasheets and / or specifications may vary in different applications and performance may vary over time. All operating parameters, including typical parameters, must be validated for each customer application by the customer's technical experts. Product specifications do not expand or otherwise modify Vishay's terms and conditions of purchase, including but not limited to the warranty expressed therein.

Except as expressly indicated in writing, Vishay products are not designed for use in medical, life-saving, or life-sustaining applications or for any other application in which the failure of the Vishay product could result in personal injury or death. Customers using or selling Vishay products not expressly indicated for use in such applications do so at their own risk. Please contact authorized Vishay personnel to obtain written terms and conditions regarding products designed for such applications.

No license, express or implied, by estoppel or otherwise, to any intellectual property rights is granted by this document or by any conduct of Vishay. Product names and markings noted herein may be trademarks of their respective owners.
