Vishay BCcomponents

Conductive Polymer Aluminum Capacitors SMD (Chip), Low Impedance

Fig. 1

QUICK REFERENCE DATA							
DESCRIPTION	VALUE						
Nominal case sizes (L x W x H in mm)	6.3 x 6.3 x 5.8 to 10.0 x 10.0 x 12.4						
Rated capacitance range, C _R	10 μF to 1500 μF						
Tolerance on C _R	± 20 %						
Rated voltage range, U _R	6.3 V to 50 V						
Category temperature range	-55 °C to +105 °C						
Endurance test at 105 °C	5000 h						
Useful life at 105 °C	5000 h						
Shelf life at 0 V, 105 °C	1000 h						
Based on sectional specification	IEC 60384-25 / CECC 32300						
Climatic category IEC 60068	55 / 105 / 56						

FEATURES

- Extended useful life: up to 5000 h at 105 °C
- Very low ESR and high ripple current
- Voltages up to 50 V
- SMD-version with base plate, lead (Pb)-free reflow solderable
- · Material categorization: for definitions of compliance please see www.vishay.com/doc?99912

APPLICATIONS

- · Industrial and professional applications
- Telecommunications and IT
- Portable and mobile equipment

MARKING

- Rated capacitance (in µF)
- Rated voltage (in V)
- Date code, in accordance with IEC 60062
- · Black mark or "-" sign indicating the cathode (the anode is identified by beveled edges)
- Code indicating group number (85)

PACKAGING

Supplied in blister tape on reel

RoHS COMPLIANT

MOUNTING

The capacitors are designed for automatic placement on to printed-circuit boards.

Optimum dimensions of soldering pads depend amongst others on soldering method, mounting accuracy, print layout and / or adjacent components.

For recommended soldering pad dimensions, refer to Fig. 3 and Table 3.

SOLDERING

Soldering conditions are defined by the curve, temperature versus time, where the temperature is that measured on the component during processing.

For maximum conditions refer to Fig. 4.

Any temperature versus time curve which does not exceed the specified maximum curves may be applied.

As a general principle, temperature and duration shall be the **minimum** necessary required to ensure good soldering connections. However, the specified maximum curves should never be exceeded.

Fig. 3 - Recommended soldering pad dimensions

Note

⁽¹⁾ Identical with endurance for this series

Endurance can be calculated by formula below:

 $L = L_{Tmax.} \times 10^{\frac{T_{max.} - T_a}{20}}$

L: estimated lifetime (h)

L_{Tmax}: base lifetime specified at maximum operating temperature with applied DC voltage (h)

T_{max.}: rated maximum operating temperature (°C)

Ta: actual ambient temperature (°C)

TEST PROCEDURES AND REQUIREMENTS			
TEST		PROCEDURE	REQUIREMENTS
NAME OF TEST	REFERENCE	(quick reference)	HEGOMENIENTO
Mounting	IEC 60384-25, subclause 4.3	Shall be performed prior to tests mentioned below; reflow soldering; for maximum temperature load refer to chapter "Mounting"	$ \Delta C/C: \pm 5 \% $ tan $\delta \leq$ spec. limit $I_{L2} \leq$ spec. limit
Endurance	IEC 60384-25 / CECC 32300, subclause 4.15	T _{amb} = 105 °C; U _R applied; for test duration see Table 7	$\begin{array}{l} \Delta C/C: \pm 20 \ \%\\ tan \ \delta \leq 1.5 \ x \ spec. \ limit\\ I_{L2} \leq spec. \ limit\\ ESR \leq 1.5 \ x \ spec. \ limit \end{array}$
Useful life	CECC 30301, subclause 1.8.1	T_{amb} = 105 °C; U _R and I _R applied; for test duration see Table 7	$\begin{array}{l} \Delta C/C: \pm 20 \ \%\\ tan \ \delta \leq 1.5 \ x \ spec. \ limit\\ I_{L2} \leq spec. \ limit\\ ESR \leq 1.5 \ x \ spec. \ limit \end{array}$
Shelf life (storage at high temperature)	IEC 60384-25 / CECC 32300, subclause 4.16	T _{amb} = 105 °C; no voltage applied; 1000 h after test: U _R to be applied for 30 min, 24 h to 48 h before measurement	For requirements see "Endurance test" above

Statements about product lifetime are based on calculations and internal testing. They should only be interpreted as estimations. Also due to external factors, the lifetime in the field application may deviate from the calculated lifetime. In general, nothing stated herein shall be construed as a guarantee of durability.

Disclaimer

ALL PRODUCT, PRODUCT SPECIFICATIONS AND DATA ARE SUBJECT TO CHANGE WITHOUT NOTICE TO IMPROVE RELIABILITY, FUNCTION OR DESIGN OR OTHERWISE.

Vishay Intertechnology, Inc., its affiliates, agents, and employees, and all persons acting on its or their behalf (collectively, "Vishay"), disclaim any and all liability for any errors, inaccuracies or incompleteness contained in any datasheet or in any other disclosure relating to any product.

Vishay makes no warranty, representation or guarantee regarding the suitability of the products for any particular purpose or the continuing production of any product. To the maximum extent permitted by applicable law, Vishay disclaims (i) any and all liability arising out of the application or use of any product, (ii) any and all liability, including without limitation special, consequential or incidental damages, and (iii) any and all implied warranties, including warranties of fitness for particular purpose, non-infringement and merchantability.

Statements regarding the suitability of products for certain types of applications are based on Vishay's knowledge of typical requirements that are often placed on Vishay products in generic applications. Such statements are not binding statements about the suitability of products for a particular application. It is the customer's responsibility to validate that a particular product with the properties described in the product specification is suitable for use in a particular application. Parameters provided in datasheets and / or specifications may vary in different applications and performance may vary over time. All operating parameters, including typical parameters, must be validated for each customer application by the customer's technical experts. Product specifications do not expand or otherwise modify Vishay's terms and conditions of purchase, including but not limited to the warranty expressed therein.
