# **IRF460**

# Description

**Product Summary** Part Number

IRF460

HEXFET® MOSFET technology is the key to IR Hirel advanced line of power MOSFET transistors. The efficient geometry and unique processing of this latest "State of the Art" design achieves: very low on-state resistance combined with high trans conductance; superior reverse energy and diode recovery dv/dt capability.

**REPETITIVE AVALANCHE AND dv/dt RATED** 

RDS(on)

0.27Ω

 $I_{D}$ 

21A

The HEXFET transistors also feature all of the well established advantages of MOSFETs such as voltage control, very fast switching and temperature stability of the electrical parameters. They are well suited for applications such as switching power

supplies, motor controls, inverters, choppers, audio amplifiers and high energy pulse circuits.
