

### **Tracking Regulator**

**TLE 4252** 

#### **Features**

- Output tracking tolerance to reference ≤ ±0.2%
- Output voltage adjust down to 1.5 V
- 250 mA output current capability
- Enable function
- Very low current consumption in OFF mode
- Wide operation range: up to 40 V
- Wide temperature range: -40 °C  $\leq T_i \leq$  150 °C
- Output protected against short circuit to GND and Battery
- Overtemperature protection
- Reverse polarity proof
- Green Product (RoHS compliant)
- AEC Qualified

### **Short Functional Description**

The **TLE 4252** is a monolithic integrated low-drop voltage tracking regulator in a very small SMD package PG-TO252-5-11. It is designed to supply off-board systems, e.g. sensors in engine management systems under the severe conditions of automotive applications. Therefore the device is equipped with additional protection functions against reverse polarity and short circuit to GND and battery.

With supply voltages up to 40 V the output voltage follows a reference voltage applied at the adjust input with high accuracy. The reference voltage applied directly to the adjust input or by an e.g. external resistor divider can be 1.5 V at minimum.

The output is able to drive loads up to 250 mA at minimum while they follow e.g. the 5 V output of a main voltage regulator as reference with high accuracy.

The **TLE 4252** tracker can be switched into stand-by mode to reduce the current consumption to very low values. This feature makes the IC suitable for low power battery applications.

## **Block Diagram**

Figure 1 Internal Circuit Blocks

Figure 2 Pin Configuration (Draft, subject to alternation!)

 Table 1
 Pin Definitions and Functions (draft, subject to alternation)

| Pin No. | Symbol | Function  |
|---------|--------|---|
| 1       | I      | Supply voltage input; Input for battery or a pre-regulated voltage of a e.g. DC to DC converter.  |
| 2       | EN     | <b>Enable input for tracker</b> ; An active high signal turns on the device, with active low the tracker is turned off.   |
| 3       | GND    | Ground; Connected to the heatsink of the package.   |
| 4       | ADJ    | Adjust input for tracker; Input for the reference voltage which can be connected directly or by voltage divider to the reference (see Application Information).                 |
| 5       | Q      | Output voltage of tracker; For a stable operation to avoid ringing at the output connect a capacitor of $C_{\rm Q} \ge$ 10 $\mu \rm F$ and $0 \le \rm ESR \le 5~\Omega$ to GND. |

 Table 2

<sup>1)</sup> Measured when the output voltage  $V_{\rm Q}$  has dropped 100 mV from the nominal value.

<sup>2)</sup> The current limit depends also on the input voltage, see graph output current vs. input voltage in the diagrams section.

<sup>3)</sup> Specified by design. Not subject to production test.

### **Application Information**

Figure 3 Application Circuit: Output Voltage < Reference Voltage

**Figure 3** shows a typical application circuit with  $V_{\rm Q} < V_{\rm REF}$ . Of course, also  $V_{\rm Q} = V_{\rm REF}$  is feasible by directly connecting the reference pin of the TLE 4252 D to the appropriate voltage level without voltage divider.

The output voltage calculates to:

$$V_{\rm Q} = V_{\rm REF} \times \left(\frac{R_{\rm 2ADJ}}{R_{\rm 1ADJ} + R_{\rm 2ADJ}}\right) \tag{1}$$

### **Diagrams**

# Output Current Limit $I_{\mathsf{Q}}$ versus Input Voltage $V_{\mathsf{I}}$

# Current Consumption $I_{\rm q}$ versus Output Current $I_{\rm Q}$

# Drop Voltage $V_{\mathrm{DR}}$ versus Output Current $I_{\mathrm{Q}}$

# Drop Voltage $V_{\rm DR}$ versus Junction Temperature $T_{\rm J}$

### **Package Outlines**

### Green Product (RoHS compliant)

To meet the world-wide customer requirements for environmentally friendly products and to be compliant with government regulations the device is available as a green product. Green products are RoHS-Compliant (i.e Pb-free finish on leads and suitable for Pb-free soldering according to IPC/JEDEC J-STD-020).

You can find all of our packages, sorts of packing and others in our Infineon Internet Page "Products": <a href="http://www.infineon.com/products">http://www.infineon.com/products</a>.
