CY3655 enCoRe™ II Development Kit

Last Updated:Feb 26, 2018

This development kit is no longer available. This web page has been left in place for informational purposes only. We recommend that customers instead purchase both the CY3655-EXT and CY3215-DK.

The enCoRe(TM) II development system, based on the highly refined PSoC(TM) (Programmable System-on-Chip(TM)) tools, supplies the user with an in-circuit emulator (ICE) that works in conjunction with actual silicon to provide an accurate and efficient development system. The PSoC Designer(TM) software consists of a graphical user interface, assembler, C compiler, linker and debugger for a highly integrated code development environment. A compliant USB "User Module" along with PS/2 and other peripheral User Modules simplifies the learning curve and speeds development time.

The enCoRe II development system is available in two ways - each provides the user with the same set of tools:

- The CY3655-DK provides the complete set of tools for new users.
- . The CY3655-EXT extension kit provides just the enCoRe II specific items for customers who already have the base in-circuit emulator in the CY3215-DK.

Please contact your local sales office for the availability of the foot parts. Hardware Description

The complete CY3655-DK includes all items in both of the lists below.

The CY3655-EXT includes the following items:

- Application Board
- enCoRe II Pod
- enCoRe II LV Pod ٠
- 40, 18, and 16-pin PDIP feet
- Modular Programmer base board (CY3216) 3 matrix cards (CY3216-01, CY3216-02, CY3216-03)
- 5-pin ISSP header to USB receptacle programming adapter plug (CY3655-PLG)
- Standard USB cable
- PS/2 male-to-male cable
- PSoC Designer Software CD-ROM
- Printed documents

The CY3215-DK includes:

- ICE-Cube In-Circuit Emulator
- ICE Flex-Pod for CY8C29X family
- Backward compatibility Cat-5 Adapter
- ٠ 110 ~ 240V Power Supply
- Euro-Plug Adapter
- Mini-Eval Programming Board in one
- ISSP Cable ٠
- Downloaded from Arrow.com.
