

PORTNOTE®

VDSLDriver Side Protection

Solution Products

2038-110-SM-RPLF

TISP4P015L1NR-S

Design Kit

Objective

VDSL provides fast data transmission, usually over a twisted pair of copper wires. This solution protects these ports against surge and power contact threats.

Solution

1 GDT: 2038-110-SM-RPLF 1 Thyristor: TISP4P015L1NR-S 1 Diode Bridge: CD143A-SR70

Compliance

ITU-T Basic and Enhanced GR-1089-CORE

Alternate Recommendations

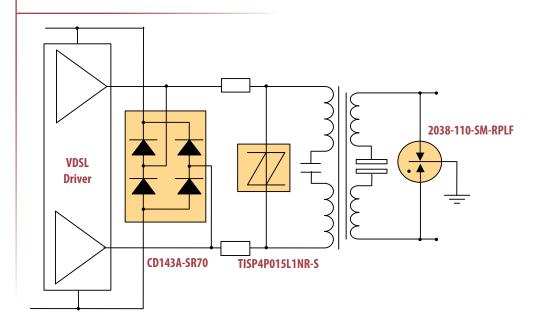

Other PortNote® Solutions:

• VDSL: Line Side Protection

Variations of this circuit are available depending on specific design constraints; contact your local Bourns technical representative for more information.

Benefit

This solution provides protection on the driver side without impairing the VDSL 17 MHz signal.

The schematic above illustrates the application protection and does not constitute the complete circuit design. Customers should verify actual device performance in their specific applications.
