

Design Kits - Modular Contacts

Bourns® Modular Contacts are off-the-shelf interconnect devices that can be used in cellular telephones, PDAs, laptop computers, portable medical and test equipment, anywhere a rechargeable battery pack is required.

Because they can be used as either compression or sliding Modular Contacts, they can function as connectors for many other non-battery related applications.

In order to obtain a Bourns® Design Kit please contact your local [Bourns sales office or authorized Bourns distributor](#).
