

**Features**

- **Wide product range**  
Shape: Standard type  
Side view type  
Connector: 2 m cable length type  
M12 plug-in connector type
- Diffuse reflective type sensor with sensitivity adjuster is available.
- M18 thread size for convenient mounting
- Strong resistance IP67
- Convenient universal sensor mounting stand is available.

Notes: 1) The model No. with "E" shown on the label affixed to the thru-beam type sensor is the emitter, "D" shown on the label is the receiver.

(e.g.) Emitter of CY-111A: CY-111E, Receiver of CY-111A: CY-111AD

2) The reflector is sold separately.

3) The sensing range of the retroreflective type sensor is specified for the RF-420 reflector (optional).

**M12 plug-in connector type**

M12 plug-in connector type is also available.

When ordering this type, "-Z" for the M12 plug-in connector type to the model No.

(e.g.) M12 plug-in connector type of CY-111A-P is "CY-111A-P-Z".

In case of the retroreflective type, M12 plug-in connector type of

CY-19□-P-Y is "CY-19□-P-Z-Y".

## DETECTION CURVES

## PRECAUTIONS FOR PROPER USE

- Never use this product as a sensing device for personnel protection.
- In case of using sensing devices for personnel protection, use products which meet laws and standards, such as OSHA, ANSI or IEC etc., for personnel protection applicable in each region or country.

### Mounting

- The tightening torque should be 3 N·m or less.
- Use a cable with connector **CN-24C(L)-C□** (optional) for M12 connector type.  
Tightening torque for connector part is 2 N·m or less.

### Mounting drawing with sensor or reflector RF-420

### Wiring

- Make sure that the power supply is off while wiring.
- Verify that the supply voltage variation is within the rating.
- If power is supplied from a commercial switching regulator, ensure that the frame ground (F.G.) terminal of the power supply is connected to an actual ground.
- Ensure that an isolation transformer is utilized for the DC power supply. If an autotransformer is utilized, the main body or power supply may be damaged.
- If the used power supply generates a surge, connect a surge absorber to the power supply to absorb the surge.
- Do not use during the initial transient time (0.5 sec) after the power supply is switched on.
- In case noise generating equipment (switching regulator, inverter motor, etc.) is used in the vicinity of this product, connect the frame ground (F.G.) terminal of the equipment to an actual ground.
- Do not run the wires together with high-voltage lines or power lines or put them in the same raceway. This can cause malfunction due to induction.
- Damage or burnout may result in case of short circuit of load or miswiring.
- Make a cable length as short as possible to lessen noise pickup.

### Others

- Our products have been developed / produced for industrial use only.
- Take care that the sensor is not directly exposed to fluorescent lamp from a rapid-starter lamp or a high frequency lighting device, as it may affect the sensing performance.
- Avoid using a product where there is excessive vapor, dust or corrosive gas, or in a place where it could be exposed directly to water or chemicals.
- Take care that the sensor does not come in direct contact with water, oil, grease or organic solvents, such as, thinner, etc.
- Do not use in an environment containing inflammable or explosive gases.
- Never disassemble or modify the product.
