Amplifier Built-in / U-shaped Micro Photoelectric Sensor

Ultra-small / Cable type **PM-25** SERIES

Compact / Cable type **PM-45** SERIES

Compact / Connector built-in type **PM-65** SERIES

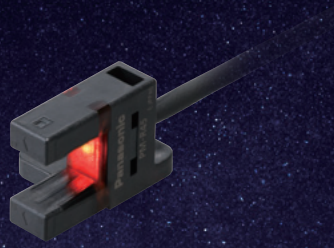

CE
Conforming to
EMC Directive

S
Certified
(Some models only)

PM-25 SERIES

The PM-25 Series is a small, black, U-shaped sensor with a red light-emitting diode (LED) visible through a central opening. It has a thin black cable extending from the top.

PM-45 SERIES

The PM-45 Series is a black, U-shaped sensor with a red LED visible through a central opening. It has a black cable extending from the top.

PM-65 SERIES

The PM-65 Series is a black, U-shaped sensor with a red LED visible through a central opening. It has a multi-colored cable (red, blue, green, yellow) extending from the top.

Ultimate U-shaped micro photoelectric sensors
One Step Ahead in Performance and Mounting Ease

Industry's First* and Industry's Top-in-Class* Advanced Sensors in the Industry.

The Only

Industry's first

Three protection circuits standard on all models

PM-25 SERIES PM-45 SERIES PM-65 SERIES

All models are standardly equipped with the following protection circuits in their compact bodies. These protection circuits minimize the possibility of sensor malfunctions caused by erroneous wiring.

- 1 Reverse supply polarity protection circuit
- 2 Reverse output polarity protection circuit
- 3 Output short-circuit protection circuit

The Only

Industry's first

Industry's first! IP64 rating

PM-25 SERIES PM-45 SERIES

Our original integrated molding method has eliminated grooves and gaps on the sensing surface and main body, thus reducing the possibility of malfunctions caused by splashing water or dust.

No. 1
Industry's top-in-class

Large and easy to see Multi-angle operation indicator

PM-25 SERIES PM-45 SERIES PM-65 SERIES

The large operation indicator (orange) lights up when the beam enters. The indicator is easy to see from above and from the sides.

[Look!]

All models easy to mount with M3 screws

PM-25 SERIES PM-45 SERIES PM-65 SERIES

The sensor unit can be installed with one or two M3 screws.

* M3 screws and washers are not included.

- Models requiring one M3 screw for installation
PM-F25, PM-R25, PM-F65, PM-R65
- Models requiring two M3 screws for installation
Models other than above

No. 1
Industry's top-in-class

Compact size

PM-45 SERIES

All new models require significantly less mounting space than our conventional models when mounted with the same pitch. What's more, the new models can directly replace our conventional models currently in use.

Resistant to vibrations and impacts

PM-25 SERIES PM-45 SERIES PM-65 SERIES

The sections where stress concentrates, such as the connecting section of the cable and internal circuit, are covered with a resin. This helps prevent malfunctions caused by vibrations and impacts.

Translate to the Most

* As of November 2015, according to our company's survey

The Only

Industry's first

Ample beam emitting / receiving distance of 6 mm 0.236 in

PM-25 SERIES PM-45 SERIES PM-65 SERIES

The beam emitting and receiving sections are 0.5 mm 0.02 in thinner than those on our conventional models while their external dimensions are the same. As a result, the distance between the beam emitting point and receiving point increased by 1 mm 0.039 in. The wider distance means less possibility of collision between the sensing section and sensing object.

The Only

Industry's first

Beam marks for easy adjustment

PM-25 SERIES PM-45 SERIES PM-65 SERIES

The upper-limit and lower-limit positions of beam can be visually confirmed from the front, back, right and left sides of the sensor unit. This allows easy adjustment of the position of sensing object.

APPLICATIONS

■ Positioning of a pallet

Pallet is stopped by sensing the dog*.

■ Sensing the starting point and overrun of a moving body

Starting point and overrun is sensed using the dog* on the base.

■ Sensing the starting point on a rotating body

* "Dog" refers to the sensing object for activating the sensor's detecting operation.

WIDE VARIATION

Sensors come in various shapes to suit a wide range of mounting conditions

■ Ultra-small / Cable type **PM-25 SERIES** Easy mounting with M2 / M3 screws!

■ Compact / Cable type **PM-45 SERIES** Compact size!

■ Compact / Connector built-in type **PM-65 SERIES** Easy connection with a single touch using commercially-available connectors

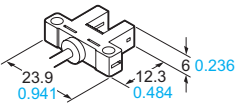

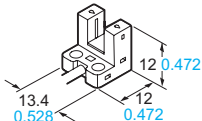

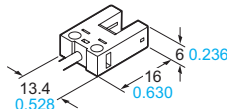

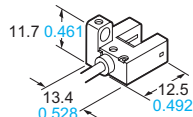

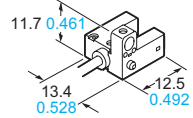

Ultra-small / Cable type **PM-25** SERIES

Cable type	NPN output	1 m 3.281 ft cable	3 m 9.843 ft cable	1 m 3.281 ft bending-resistant cable
Built-in connector	PNP output	1 m 3.281 ft cable	3 m 9.843 ft cable	1 m 3.281 ft bending-resistant cable

Easy mounting with M2 / M3 screws!

Current consumption				15 mA or less		
Output		<NPN output type> NPN open-collector transistor <ul style="list-style-type: none">Maximum sink current: 50 mAApplied voltage: 30 V DC or less (between output and 0 V)Residual voltage: 2 V or less (at 50 mA sink current) 1 V or less (at 16 mA sink current)		<PNP output type> PNP open-collector transistor <ul style="list-style-type: none">Maximum source current: 50 mAApplied voltage: 30 V DC or less (between output and + V)Residual voltage: 2 V or less (at 50 mA source current) 1 V or less (at 16 mA source current)		
		Output operation		Incorporated with 2 outputs: Light-ON / Dark-ON		
		Short-circuit protection		Incorporated		
Response time				Under light received condition: 20 μs or less Under light interrupted condition: 80 μs or less (Maximum response frequency: 3 kHz) (Note 2)		
Operation indicator				Orange LED (lights up under light received condition)		
Pollution degree				3		
Environmental resistance	Protection		IP64 (IEC)			
	Ambient temperature (Note 3, 4)		−25 to +55 °C −13 to +131 °F (No dew condensation or icing allowed), Storage: −30 to +80 °C −22 to +176 °F			
	Ambient humidity		5 to 85 % RH, Storage: 5 to 95 % RH			
	Ambient illuminance		Fluorescent light: 1,000 lx at the light-receiving face			
	Voltage withstandability		1,000 V AC for one min. between all supply terminals connected together and enclosure			
	Insulation resistance		20 MΩ, or more, with 250 V DC megger between all supply terminals connected together and enclosure			
	Vibration resistance		10 to 2,000 Hz frequency, 1.5 mm 0.059 in double amplitude (maximum acceleration 196 m/s ²) in X, Y and Z directions for two hours each			
	Shock resistance		15,000 m/s ² acceleration (1,500 G approx.) in X, Y and Z directions three times each			
Emitting element				Infrared LED (Peak emission wavelength: 855 nm 0.034 mil, non-modulated)		
Material				Enclosure: PBT, Display section: Polycarbonate		
Cable				0.09-mm ² 4-core cabtyre cable, PVC, 1 m 3.281 ft long	0.1-mm ² 4-core bending-resistant cabtyre cable, PVC, 1 m 3.281 ft long (Note 5, 6)	0.09-mm ² 4-core cabtyre cable, PVC, 3 m 9.843 ft long
Cable extension				Extension up to total 100 m 328.084 ft is possible with 0.3 mm ² , or more, cable. (Note 7)		
Weight				Net weight: 10 g approx., Gross weight: 15 g approx. Net weight: 30 g approx., Gross weight: 35 g approx.		

Notes: 1) Where measurement conditions have not been specified precisely, the conditions used were an ambient temperature of +23 °C +73.4 °F.

2) The response frequency is the value when the disc, given in the figure below, is rotated.

3) In case the PM-25 series is used at an ambient temperature of +50 °C +122 °F, or more, make sure to mount it on a metal body.

4) Note that the cable of PM-□25-R loses its flexibility when the ambient temperature decreases to about -10 °C +14 °F.

5) The cable of PM-□25-R is a bending-resistant cable usable on a moving base. When the sensor is mounted on a moving base, secure the sensor cable joint at the unit in place so that stress is not applied to it.

6) When storing PM-□25-R, make sure that the cable does not come into contact with the sensing section or operation indicator.

7) If the cable is extended to 20 m 65.617 ft or longer, confirm that the supply voltage at the end of the cable attached to the sensor is 4.5 V or higher.

SENSING CHARACTERISTICS (TYPICAL)

PM-25 series

Sensing position

PM-65 series

Sensing position

PM-45 series

Sensing position

PRECAUTIONS FOR PROPER USE

- Never use this product as a sensing device for personnel protection.
- In case of using sensing devices for personnel protection, use products which meet laws and standards, such as OSHA, ANSI or IEC etc., for personnel protection applicable in each region or country.

Mounting

PM-25 series

- The following conditions must be observed when using screws to mount the sensor unit.

Screw	Spring washer	Flat washer	Tightening torque
M2 screw	1 pc.	ø4.3 mm ø0.169 in (small round washer)	0.15 N·m
M3 screw	1 pc.	ø6 mm ø0.236 in (small round washer)	0.5 N·m

< When using M2 screws for mounting > < When using M3 screws for mounting >

When using the optional mounting screw set **MS-M2**, a spring washer is included.

- In case the **PM-25** series is used at an ambient temperature of +50 °C +122 °F, or more, make sure to mount it on a metal body.

PM-45 series

- The following conditions must be observed when using screws to mount the sensor unit.

Screw	Spring washer	Flat washer	Tightening torque
M3 screw	1 pc.	ø6 mm ø0.236 in (small round washer)	0.5 N·m

PM-65 series

- The following conditions must be observed when using screws to mount the sensor unit.

Screw	Spring washer	Flat washer	Tightening torque
M3 screw	1 pc.	ø6 mm ø0.236 in (small round washer)	0.5 N·m

PRECAUTIONS FOR PROPER USE

Cable extension

PM-25 series / PM-45 series

- Cable extension is possible up to an overall length of 100 m **328.084 ft** with a 0.3 mm², or more, cable. However, since a voltage drop shall occur due to the cable extension, ensure that the power supply voltage at the end of the cable attached to the sensor is within the rating.

But, when the overall cable length, including the cable attached to the sensor, is as given below, there is no need to confirm the voltage.

Conductor crosssection area of extension cable	Total cable length
0.08 to 0.1 mm ²	Up to 5 m 16.404 ft
0.2 mm ²	Up to 10 m 32.808 ft
0.3 mm ²	Up to 20 m 65.617 ft

PM-65 series

- Cable extension is possible up to an overall length of 100 m **328.084 ft** with a 0.3 mm², or more, cable. However, since a voltage drop shall occur due to the cable extension, ensure that the power supply voltage at the end of the connector attached cable of the sensor or at the sensor terminals is within the rating.

But, when the overall cable length, including the cable attached to the sensor, is as given below, there is no need to confirm the voltage.

Conductor crosssection area of extension cable	Total cable length
0.08 to 0.1 mm ²	Up to 5 m 16.404 ft
0.2 mm ²	Up to 10 m 32.808 ft
0.3 mm ²	Up to 20 m 65.617 ft

Wiring (PM-65 series)

Connection method

- Insert the connector attached cable **CN-14A-C□** / **CN-14A-R-C□** in the connector part of this product as shown in the figure below.

<Connector pin position>

Connector pin No.	①	②	③	④
Terminal designation	+V	Output 1	Output 2	0 V

Disconnection method

- Press and hold the lock release lever to disconnect the cable connector.

Note: Pulling the cable without pressing the lock release lever in an attempt to disconnect the connector can cause wire breakage in the cable or damage to the connector.

When using the product as an S-mark compatible product in Korea

- The power supply cable and output cable connected to the product must be less than 10 m **32.808 ft**.

Other

- This device has been developed / produced for industrial use only.
- Since the sensor is intended for use inside machines, no special countermeasures have been taken against extraneous light. Take care that extraneous light is not directly incident on the beam receiving section.
- Do not use during the initial transient time (50 ms) after the power supply is switched on.
- Note that the cable of **PM-□25-R** loses its flexibility when the ambient temperature decreases to about -10 °C **+14 °F**.
- The cable of **PM-□25-R** is a bending-resistant cable usable on a moving base. When the sensor is mounted on a moving base, secure the sensor cable joint at the unit in place so that stress is not applied to it.
- When storing **PM-□25-R**, make sure that the cable does not come into contact with the sensing section or operation indicator.
- If the sensor is used in a place having excessive dust, periodically clean the emitting and receiving sections with a dry, soft cloth.
- If there is a large surge generating equipment, such as, motor, solenoid, electromagnetic valve, etc., in the vicinity of the sensor, use a surge absorber on that equipment. Further, do not run the sensor cables along power lines and use a capacitor between +V and 0 V, if required. Use the sensor after confirming that the surge has been eliminated.
