#### INDUCTORS

⊗TDK

#### Inductors for power circuits Wound ferrite SLF series

# SLF7055 type

#### FEATURES

O Magnetic shield type wound inductor for power circuits.

O Product lineup allows for various usages.

○ Operating temperature range: -40 to +105°C (including self-temperature rise)

#### APPLICATION

O Thin-screen TVs, LCDs, AV equipment, gaming equipment, other electrical devices

#### PART NUMBER CONSTRUCTION

\* Rated current: smaller value of either Isat or Itemp.

Isat: When based on the inductance change rate (10% below the initial value)

Itemp: When based on the temperature increase (temperature increase of 30°C by self heating)

### **REMINDERS FOR USING THESE PRODUCTS**

Before using these products, be sure to request the delivery specifications.

## SAFETY REMINDERS

Please pay sufficient attention to the warnings for safe designing when using this products.

<ul> <li>The storage period is less than 6 months. Be sure to follow the storal less).</li> <li>If the storage period elapses, the soldering of the terminal electrode</li> </ul>				
<ul> <li>Do not use or store in locations where there are conditions such as</li> </ul>				
<ul> <li>Before soldering, be sure to preheat components.</li> <li>The preheating temperature should be set so that the temperature does not exceed 150°C.</li> </ul>	difference between the solder temperature and chip temperature			
<ul> <li>Soldering corrections after mounting should be within the range of the If overheated, a short circuit, performance deterioration, or lifespan</li> </ul>	-			
When embedding a printed circuit board where a chip is mounted to a set, be sure that residual stress is not given to the chip due to the overall distortion of the printed circuit board and partial distortion such as at screw tightening portions.				
<ul> <li>Self heating (temperature increase) occurs when the power is turn design.</li> </ul>	ned ON, so the tolerance should be sufficient for the set thermal			
<ul> <li>Carefully lay out the coil for the circuit board design of the non-magn A malfunction may occur due to magnetic interference.</li> </ul>	netic shield type.			
$\bigcirc$ Use a wrist band to discharge static electricity in your body through	the grounding wire.			
$\bigcirc$ Do not expose the products to magnets or magnetic fields.				
O Do not use for a purpose outside of the contents regulated in the de	livery specifications.
