PAN9420 Evaluation Kit

PAN9420 – Connectino Arrow Connect Board

The Connectino Arrow Connect Demo board (Arduino based) features the Arrow Connect platform.

The sensor on the board sends live data over the PAN9420 to the Arrow Connect Cloud and the data will be displayed on the Arrow Connect dashboard.

The demo software running on the Connectino boards can be easily adjusted for customers needs.

[For further information, please visit the Arrow Connect Homepage](#)

PAN9420 - Experimenter Kit (Order-No. ENW49C01AYKF)

PAN9420 Kit with one PAN9420 mother board, one PAN9420 daughter board (includes the PAN9420 FCC version module), and one USB-cable packaged in a large case. The PAN9420 daughter board is equipped on the PAN9420 mother board, which has two USB to UART converters allowing the hardware access to the two UART module interfaces (command and binary interface). The PAN9420 FCC version module comes pre-loaded with a firmware for IoT applications and a Panasonic Web content example. With a few simple steps the kit is ready to use.

PAN9420 - Single daughter board (Order-No. ENW49C01AZKF)

The PAN9420 daughter board (includes the PAN9420 FCC version module) allows hardware access to the module pins for fast integration to customers application. The PAN9420 FCC version module comes pre-loaded with a firmware for IoT applications and a Panasonic Web content example. With a few simple steps the daughter board is ready to use.

PAN9420 - Arduino Shield (Order-No. ENW49C01AXKF)
