Type ABR

Order Number CMWC1ZZABR

Shielded Small WiFi 11b/g/n+MCU Module

- 2.4GHz WiFi MCU Module
- Network Topology: STA mode
- Chipset: Marvell (MW300)
- Processor: ARM Cortex-M4F
- Modulation: DSSS / CCK / OFDM

High Performance Capabilities for Internet of Things

- For Industrial IoT, Smart Home, Sensor Network
- Pre-loaded Serial to WiFi

Murata is partnering with Ayla Networks to offer a complete end-to-end platform for building world class Internet-connected products.

The Murata Type ABR Wi-Fi Connectivity Module comes pre-loaded with the Ayla Embedded Agent, enabling developers to connect to the Ayla Cloud Services and smartphone/tablet applications based on the Ayla Application Libraries.

The Ayla IoT Cloud solution provides developers a fast path to add smart phone and tablet-based control and monitoring to existing products.

Leveraging ubiquitous Wi-Fi and the power of the cloud, users can securely connect to their devices from anywhere with an Internet connection.

Murata also have Murata's own Serial Network Interface Controller Software solution.
