MEMS Evaluation Unit

The Murata MEMS Evaluation Unit demonstrates the functionality and key properties of Murata MEMS Sensors. The Murata MEMS Evaluation Unit allows designers easily test the performance of Murata MEMS Accelerometers, Gyroscopes and Inclinometers.

The Murata Digital Accelerometer and Gyroscope Sensors are available as chip carrier Sensor Boards and Analog Sensors as extension boards with high accuracy A/D converter.

Key features

- Java based Graphical User Interface
- Sensor output in graphical format
- Data logging with time stamps
- Data rate and average calculation configuration options
- Powered from PC USB port or optionally from external 7...15 VDC power supply

Interface Board
MEMS EVAL BOARD

SCC1300 Sensor Board

Digital Accelerometer
SCA8xx/21xx/31xx
Sensor Board

Analog Acc/Inclinometer
SCA10xx
Sensor Board

Order information

Order Code	Description
MEMS EVAL BOARD	Interface Board (No Sensor Board included)

Sensor Boards

Order Code	Description
SCA100T-D01-PCB	2 axis Inclinometer $\pm 30^\circ$
SCA100T-D02-PCB	2 axis Inclinometer $\pm 90^\circ$
SCA100T-D07-PCB	2 axis Accelerometer $\pm 12g$
SCA103T-D04-PCB	Diff. Inclinometer ± 15
SCA103T-D05-PCB	Diff. Inclinometer $\pm 30^\circ$
SCA1000-N1000070-PCB	2 axis Accelerometer $\pm 4g$
SCA830-D07-PCB	Digital Inclinometer $\pm 90^\circ$
SCA830-D06-PCB	1 axis Accelerometer $\pm 2g$
SCA2100-D02-PCB	2 axis Accelerometer $\pm 2g$
SCA3100-D04-PCB	3 axis Accelerometer $\pm 2g$
SCA3100-D07-PCB	3 axis Accelerometer $\pm 6g$
SCC1300-D02-PVVB SCC1300-D04-PVVB	1 axis Gyro + 3 axis Accelerometer Combo

Ordering Note: MEMS Evaluation Unit needs both MEMS EVAL BOARD Interface Board and product specific Sensor Board. The same Interface Board can be used with all Sensor Boards.

Interface Board with
SCC1300 Sensor Board
