Withstanding surge voltage

Capacitance and tolerance in clear

Nominal DC voltage in clear

RMS current in clear

Date of manufacture (IEC coding)

#### **PACKAGING MATERIAL**

Cylindrical in plastic case filled with thermosetting resin.

Outputs: threaded inserts either M6 or M8.

#### **HOW TO ORDER**

FPG	8	6	R		
	Т	Т	Т		
Series FPG = Standard FPH = RoHS Compliant	<b>Case Size</b> Case Size 8	<b>Dielectric</b> 6 = Polypropylene	Voltag Code R = 150 N = 200 P = 250 W = 260		

Metallized polypropylene dielectric capacitor with controlled self-healing.

Reinforced metallization on margins developed for high impulse currents.

Axial connections specially developed to reduce series inductance and to provide rigid mechanical mounting.

#### APPLICATIONS

• Protection of Gate Turn-off Thyristor (G.T.O.)

Medium Frequency Tuning

#### HOT SPOT TEMPERATURE CALCULATION

See Hot Spot Temperature, page 3.

$$\theta_{hot spot} = \theta_{ambient} + (P_d + P_t) \times R_{th}$$

with

millimeters

Plastic Case

Resin

 $P_d$  (Dielectric losses) = Q x tg $\delta_0$  $\rightarrow [\frac{1}{2} \times C \times (V + t_0)^2 \times f] \times (2 \times 10^4)$ 

$$\Rightarrow [ \frac{1}{2} \times C_n \times (V_{\text{peak}} \log_{\text{peak}})^2 \times I ] \times (2 \times I)$$

$$P_t$$
 (Thermal losses) =  $R_s \times (I_{rms})^2$ 

where

- in Farads C. V in Volts
- in Amperes
- $\mathbf{I}_{\mathsf{rms}}$ in Ohms R。
- in Hertz f
- θin°C
- R<sub>th</sub> in °C/W

Due to the design of the capacitor and its technology, the thermal impedance between the terminations and the core of the capacitor is low, it is necessary to take care that the capacitor is never overheated by use of incorrect sized connections.

In the case where the series diodes are screwed to the capacitor, cooling of the diodes must be taken in account.

Do not use the capacitor as a heat sink.

Due to the complexity of the diode/capacitor thermal exchanges, we recommend that thermal measurements shall be made on the different components. We would be pleased to advise you on specific problems.

#### WORKING TEMPERATURE

(according to the power to be dissipated)

-40°C to +85°C

#### **ELECTRICAL CHARACTERISTICS**

Capacitance range C <sub>n</sub>	0.12µF to 6µF				
Tolerance on C <sub>n</sub>	±5%				
Rated DC voltage V <sub>n</sub> dc	800 to 3000 V				
Peak voltage V <sub>peak</sub>	1200 to 4000 V				
Allowable overvoltage $V_s$ (for 10 s/day)	1500 to 4600 V				
Nominal RMS voltage V <sub>n</sub> dc	500 to 1400 V				
Stray inductance	≈10 nH				
RMS current	I <sub>rms</sub> max. = up to 80 A The currents shown in the tables are maximum. It is necessary to respect the thermal limits of the dielectric 85°C see "Hot spot temperature calculation"				
Insulation resistance	R <sub>i</sub> x C ≥ 30,000 s				
Impulse current	I <sup>2</sup> .t max. given in the tables Spikes or peak currents in the capacitors may cause a deterioration of the bonding between the metallization and the connections. These bonds are capable of withstanding only a limited amount of energy for each spike. The table shows the maximum energy permitted in the form (I <sup>2</sup> .t), where I is in Ampere, and t is in seconds.				
<b>Note:</b> The formula (l <sup>2</sup> .t) replaces dV/dt which is less e This type of capacitor has been designed to wit	easy to use as it is not an expression of energy (I = C.dV/dt). hstand high (I².t) values.				
Variation of capacitance with temperature	$\frac{\Delta C}{C} \le \pm 2\%$ between -40 and +85°C				
Climatic category	40/085/56 (IEC 60068)				
Test voltage between terminals @ 25°C	$V_s$ during 10s				
Test voltage between terminals and case @ 25°C (Type test)	@ 4 kVrms @ 50 Hz during 1 min.				
Dielectric	Polypropylene				

## PROTECTION APPLICATION NOTES

### G.T.O. PROTECTION

Choice of voltage:  $V_1 \le V_{peak}$  $V_2 \le V_n dc$ Maximum overvoltage  $\le V_s (10 \text{ s/day})$ 

Nominal DC voltage ( $V_{n}dc)$  and peak voltage ( $V_{\text{peak}})$  are given in the table of values.

KUCERA KW/// The Important Information/Disclaimer is incorporated in the catalog where these specifications came from or available online at www.avx.com/disclaimer/ by reference and should be reviewed in full before placing any order.
