COAXIAL CONNECTOR

Ultra-Miniature SMT **SWC** Type

SMD type coaxial connector with switch. For high density mounting. Useful for automatic characteristic measurement of hand held phone.

FEATURES

1. The coaxial connector with switch is very useful for characteristic measurement of hand held phone and microwave circuit.
2. It is possible to switch the line connection and disconnection easily by special probe.
3. Small size, low profile. Size 3.4X3.3X1.9mm (LXWXH). Mounting dimension 11.2mm².
4. Excellent characteristic. Low IL (0.1dB max.). VSWR 1.2max at DC to 3GHz. Isolation 15 dB min.
5. Surface mountable and reflow solderable.
6. Tape package available.

APPLICATION

Cellular phone, PHS, Other wireless and measurement equipment.

PART NUMBER

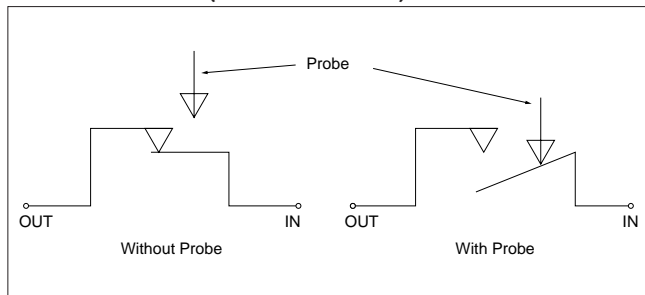

● Receptacle (coaxial connector with switch)

Part Number	Packaging	Quantity
MM8329-2600	Bulk package	Free
MM8329-2600TB1	178mm Dia. Taping	1000pcs/reel
MM8329-2600TB2	330mm Dia. Taping	3000pcs/reel

■ SPECIFICATION AND CHARACTERISTIC (COAXIAL CONNECTOR WITH SWITCH)

● Receptacle (MM8329-2600)

Item	Specification
Frequency Range	From DC to 3GHz
VSWR	1.2max.
Nominal Impedance	50Ω
Temperature Range	-40°C to +90°C
Voltage Rating	250Vrms
Contact Resistance	25mΩ max.
Withstanding Voltage	AC300±20Vrms
Insulation Resistance	500MΩ min.
IL at On switch	0.1dB max.
Isolation at OFF switch	15dB min.
Durability	50cycles

■ RATING AND CHARACTERISTICS

● Probe for automatic measurement (MM126012)

Item	Specification
Frequency Rating	DC to 3GHz
VSWR	1.5max.
Nominal Impedance	50Ω
Durability	100000

● L Type probe with lock function (MXGM76RY1000)

Item	Specification
Frequency Rating	DC to 3GHz
VSWR	1.3max.
Nominal Impedance	50Ω
Durability	1000

■ MATERIALS AND FINISH

Part Name	Material	Finish
Elastomer	Insulation rubber	None
Case	Engineering plastic	None
Ground terminal	Copper alloy	Silver plating
Hot terminal (A)	Copper alloy	Gold plating
Hot terminal (B)	Copper alloy	Gold plating

■ NOTICE

1. Automatic measurement probe (MM126012)
MM126012 should be used on the condition in Fig.3 for good connection without any damages.
2. L type probe with lock function (MXGM76RY1000)
 - ① See Fig.4. For connection, it should be confirmed if the direction of probe and receptacle are matched. Connect vertically with pinching the side of handle. After connection, the probe should be pushed from the top of handle, and be confirmed if it is locked. For disconnection, the probe should be disconnected vertically with pinching the side of handle. The probe must not be disconnected with pinching the cable not to have any damage.
 - ② The cable must not be twisted for protection of the center conductor assembled point.
 - ③ For connector protection.
 - (1) The stress for connector body.
See Fig.5. The stress over 2.94N (0.3kgf) must not be applied to the mated connector body from direction A or B.
 - (2) The stress for cable assembled point.
See Fig.5. The stress over 2.94N (0.3kgf) must not be applied to the cable assembled point of mated connector from direction C.
 - (3) The stress for cable.
See Fig.5. The stress over 14.7N (1.5kgf) must not be applied to the cable of connector to direction D.
3. Pattern layout
Use the pattern in Fig.6 for the best characteristic.
4. Soldering condition
 - ① Reflow soldering
Use the reflow profile as shown in Fig.1 and Fig.2.
 - ② Iron soldering
Use the following condition.
 - (1) Preheating : 150°C, 60—120sec
 - (2) Temperature of tip : 280°C
 - (3) Time : less than 3sec.
 - ③ Solder and flux
 - (1) Use Rosin based flux, but not with strong acid flux (Chlorine content should be less than 0.20wt%).
 - (2) Use the eutectic solder
 - ④ The flux should not be left inside of receptacle because of the electrical performance degradation (contact resistance and etc.).
5. Cleaning
Do not wash the this connector.
6. Storage condition
Temperature : -10 to +40°C
Humidity : 30 to 80%RH

■ LAND PATTERN (Fig. 6)

■ DIMENSIONS OF PLASTIC TAPE (Fig. 7)

COAXIAL CONNECTOR

Ultra-Miniature SMT **GSC** Type

New coaxial connector GSC type. Microwave, Low profile 2mm height, SMD.

FEATURES

1. The mating height is only 2mm maximum by new mechanical design. Suitable for low profile design.
2. Receptacle size is 3.0X3.0mm. Suitable for high density design.
3. New mating mechanical design makes stable feeling connection.
4. Soft and ultra thin 0.8mm diameter flexible coaxial cables is available. Easy cable lay out will be realized. In addition to flexible cable, ultra thin 0.62mm diameter semi rigid cable is also available. Low insertion loss and low leakage will be realized.
5. High performance with wide frequency range (DC to 6GHz). VSWR at DC to 3GHz is 1.2 maximum. VSWR at 3GHz to 6GHz is 1.3 maximum.
6. Surface mountable and reflow solderable.
7. Tape package is available.

APPLICATIONS

Portable telephone, cordless telephone (analog and digital), GPS, and other microwave radio and measurement equipment.

500	1000	±10
1000	-	+2% of L -0% of L

* L must be 20mm Min.

COAXIAL CONNECTOR

Ultra-Miniature SMT GSC Type

NOTICE

Disaccord with following notes could give mechanical damage and/or poor electrical performance.

1. Mechanical Stress :

Stress to the connector should be limited as shown Fig.1.

2. PCB mount pattern dimension :

Dimensions shown in Fig. 2 should be used for the PCB design.

3. Disengagement and engagement.

Use tool P/N M22001 (Fig.3). The connector to be disengaged and engaged should be pulled out or insert to the vertical direction using the tool. Do not try to pull out by the cable, because there is the possibility a wire breaks.

4. Cable and connector handling :

Do not give a twisted torque to the cable and connector.

5. Reflow soldering condition :

Reflow soldering should be carried out according to condition as shown in Fig.4.

And the eutectic solder should be used.

6. When MM9329-2700 was soldered on P.C.B.,

- Use the metal mask pattern as illustrated in Fig.2 (Thickness is 0.15mm) in order to print the proper quantity.
- Use Rosin based flux, but not with strong acid flux (Chlorine content should be less than 0.20wt%).
- Flux should be cleaned thoroughly.

7. Washing :

In case of cleaning the receptacle, please dry out the receptacle immediately after cleaning.

Do not wash cable assembly.

8. Storage of temperature and humidity.

Temperature : -10 to +40°C

Humidity : 30-80%RH

STRESS TO THE CONNECTOR (Fig.1)

1. Stress to the housing
Stress A and B : 4.9N (0.5kgf) max.
2. Stress to the outer sleeve.
Stress C : 2.94N (0.3kgf) max.
Stress D : 1.96N (0.2kgf) max.
3. Cable pull strength.
Stress E : 4.9N (0.5kgf) max. (for 88, 92, 91 cable)

PATTERN DIMENSION, METAL MUSK PATTERN (Fig. 2)

(i) Pattern Dimension

(in mm)

- (Note)
- Please design I/O pattern so that the impedance matches 50 ohm including the land pattern.
 - The material of P.C.B. is the epoxy resin of glass fabric base. ($\epsilon_r = 4.8$) Thickness is 1.0 mm.
 - The solder resist should be printed except for the land pattern on the P.C.B.

(ii) Metal Musk Pattern

Otherwise Specified ±0.1
(in mm)

COAXIAL CONNECTOR

Miniature SMT FSC Type

Miniature, Low profile, 3mm height, SMD. Right angle type receptacle available.

FEATURES

1. High engagement with new structure (50% up compared with ESC type).
2. Ultra-miniature (LXWXH : 3.4X3.4X1.5mm) for High density mounting (11.6mm²).
3. Ultra-low profile (3.0mm Max.).
4. High performance. (VSWR 1.2max. at 2GHz).
5. Matched with ultra-thin FEP coaxial cables (0.8mm dia).
6. Mountable by automatic placer.
7. Taping package applicable.
8. SMD and reflow soldering applicable.

APPLICATIONS

Portable telephone, mobile telephone, cordless telephones, GPS, and other microwave radio and measurement equipment.

Temperature Range	-40°C to +90°C
Insulation Resistance	1000MΩ Min.
Contact Resistance	10mΩ Max.
Withstanding Voltage	AC300Vrms
Durability	50 cycles

■ MATERIALS AND FINISH

Part Name	Materials	Finish
Center Contact	Beryllium copper or Brass	Gold plated
Outer Contact	Phosper bronze	Silver plated and Nickel plated
Insulator	Poly-phenylene Sulfide	None
Insulation Plate	Poly-butylen terephthalate	None
Spacer (MM3325-2507)	TFE Fluorocarbon	None
Outer Sleeve	Brass	Zinc plated

COAXIAL CONNECTOR

Coaxial Connector BFA Type

NOTICE

If this notice is not kept, it has possible that the mating portion or the cable cramping portion is destroyed.

1. P.C.B. mount pattern dimension :
Dimensions shown in Fig. 1 and Fig. 2 should be used for the P.C.B. design.
2. Stress limit to the connector :
When connected, stress to the connector should be limited as show Fig.3.
3. Insertion should be made straight to the axis of the connector.
4. Disengagement :
Use tool P/N M16000 or M16001. The connector to be disengaged should be pulled out to the vertical direction. Do not try to pull out by the cable.
5. Cable and connector handling :
Do not give a twisted torque to the cable and connector.
6. When MM3325-2505, MM3325-2507 and MM3326-2506 were soldered on P.C.B.,
 - Use Rosin based flux, but not strong acid flux (with chlorine content exceeding 0.20wt%).
 - Flux should not be left inside of product.
7. Washing :
In case of cleaning the receptacle, please dry out the receptacle immediately after cleaning. Do not wash cable assembly.
8. Storage of product
Temperature: -10 to +40°C
Humidity : 30 - 80%RH

⚠ Note:**1. Export Control**

⟨For customers outside Japan⟩

Murata products should not be used or sold for use in the development, production, stockpiling or utilization of any conventional weapons or mass-destructive weapons (nuclear weapons, chemical or biological weapons, or missiles), or any other weapons.

⟨For customers in Japan⟩

For products which are controlled items subject to the "Foreign Exchange and Foreign Trade Law" of Japan, the export license specified by the law is required for export.

2. Please contact our sales representatives or product engineers before using our products listed in this catalog for the applications listed below which require especially high reliability for the prevention of defects which might directly cause damage to the third party's life, body or property, or when intending to use one of our products for other applications than specified in this catalog.

- ① Aircraft equipment
- ② Aerospace equipment
- ③ Undersea equipment
- ④ Medical equipment
- ⑤ Transportation equipment (vehicles, trains, ships, etc.)
- ⑥ Traffic signal equipment
- ⑦ Disaster prevention / crime prevention equipment
- ⑧ Data-processing equipment
- ⑨ Application of similar complexity and/or reliability requirements to the applications listed in the above

3. Product specifications in this catalog are as of September 1999. They are subject to change or our products in it may be discontinued without advance notice. Please check with our sales representatives or product engineers before your ordering. If there are any questions, please contact our sales representatives or product engineers.**4. The parts numbers and specifications listed in this catalog are for information only. You are requested to approve our product specification or to transact the approval sheet for product specification, before your ordering.****5. Please note that unless otherwise specified, we shall assume no responsibility whatsoever for any conflict or dispute that may occur in connection with the effect of our and/or third party's intellectual property rights and other related rights in consideration of your using our products and/or information described or contained in our catalogs. In this connection, no representation shall be made to the effect that any third parties are authorized to use the rights mentioned above under licenses without our consent.****6. None of ozone depleting substances (ODS) under the Montreal Protocol is used in manufacturing process of us.**
