

Si1147 Module USB Toolstick Evaluation Kit

Si1147-M01-EVB

The Si1147 Module Evaluation Kit and accompanying Si114x Programmer's Toolkit software allow quick and easy access to the features and functions of the Si1147-M01, Si1146-M01 and Si1145-M01 optical sensors while enabling the evaluation of the sensor's performance.

The evaluation kit includes:

- SENSOR-TS-EB USB toolstick
- Si1147-M01-EB "postage stamp" daughter board
- 3 ft. I²C flat ribbon cable
