### **Features**

- 1. NFA18SD series is LC combined noise suppression filter whose noise suppression curve is very steep and deep in spite of its small shape.
- 2. This product has additional function as common mode choke coil. It works as a common mode choke coil at low frequency range, also works as a LC filter at high frequency range. This combination results good noise suppression effect without the affection to differential signal waveform.
- 3. This product has good noise suppression effect from 470MHz (for digital TV) to 2GHz. (for mobile phone) This function improves the sensibility of digital TVs or mobile phones.
- 4. Four circuits are built in 1.6x0.8mm chip size, it saves the large amount of mounting space.

### ■Aplication

Noise suppression of differential signal Noise suppression of LCD signal lines, camera module lines.
