### Capacitor with Multi-layer Lead

Product compatible with RoHS directive

### **Commercial Grade**

# Overview of the FK General (Up to 50V) Series

#### **FEATURES**

- High capacitance has been achieved through improvements in the thinning process of ceramic dielectric layers and multi-layer lamination technology.
- High reliability is maintained under specified environmental conditions.
- Low residual inductance and excellent frequency characteristics has been achieved.
- The leads are formed with a "kink" to achieve consistent insertion heights and facilitate the release of gases during soldering for dramatically improved solderability.
- Taping specifications are available for automatic insertions, which contribute to reduce on-board costs.

### Capacitor with Multi-layer Lead

#### Product compatible with RoHS directive

### **Commercial Grade**

## Overview of the FK Mid Voltage (100 to 630V) Series

#### **FEATURES**

- The capacitors adopts the unique structure designed by TDK for high voltage applications, realizing a high withstand voltage despite being small in size.
- Rated voltage Edc: 100, 200, and 630V.
- The leads are formed with a "kink" to achieve consistent insertion heights and facilitate the release of gases during soldering for dramatically improved solderability.
- Taping specifications are available for automatic insertions, which contribute to reduce on-board costs.
