The WirelessUSB(TM) Listener Tool Kit allows customers to decode and analyze the wireless traffic of one or more WirelessUSB LS(TM) devices using Cypress WirelessUSB LS 1-way or 2-way HID protocols. The CY3632L serves as an excellent debugging tool and is a must-have for CY4632 Keyboard-Mouse Reference Design Kit users who value speed to market.

The Listener Tool Kit can also capture packet traffic from several WirelessUSB LR(TM) devices from Cypress. When used together with the CY3635 N:1 Development Kit, Listener Tool enables developers to seamlessly analyze wireless transactions between the single hub and its multiple sensors.

Improve your development efficiency with the CY3632 WirelessUSB Listener Tool Kit. Developing and debugging your application has never been simpler!

Hardware Description:

This kit includes the following items:

- WirelessUSB Listener Tool
- CY3632 DVK CD-ROM
- Documentation Packet

Revisions

There have been some significant enhancements and additions to the WirelessUSB LS Listener Tool over previous revisions:

- The CY3632 DVK CD-ROM provides an installer. The installer extracts the CD-ROM's contents (excluding PSoC Designer(TM)) to the customer's hard disk in a writable format. An uninstall utility has NOT been included to ensure that if customers modify firmware, they will not risk losing their modifications. To remove the installation, simply delete the kit's installation folder (default: C:\Cypress\WirelessUSB\CY3632 v1.5) and the Start Menu shortcut to the WirelessUSB Listener Tool.
- The WirelessUSB Listener Tool hardware supports factory firmware updates via the Listener Tool software. The Listener Tool hardware in kits prior to CY3632 DVK v1.5 does

REQUEST SAMPLE

Cypress provides on-line sampling services to help qualified customers expedite new product designs. Cypress reserves the right to limit the distribution of free samples for non-qualified enterprises.
