# Features

MURATA's ceramic resonator, CERALOCK(R) with built-in load capacitors, has been widely applied as the most suitable component for clock oscillators in a broad range of microprocessors. The CSTLS series can be used in the design of oscillation circuits not requiring external load capacitors, enabling both high-density mounting and cost reduction.

#### Features

1. Oscillation circuits do not require external load capacitors. There is some variation in built-in capacitance values applicable to various IC.

2. Stable over a wide temperature range.

3. Compact, lightweight and exhibit superior shock resistance performance.

4. Enable the design of oscillator circuits requiring no adjustment.

5. Cost-effective and reliable availability.
