Bourns® H-127 Solder Lug Washer Change

In response to feedback from our Professional Audio customers, Bourns® Resistive Products Division is announcing a design change to our **H-127 Solder Lug Washer** that ships with *Model 82 Vintage Guitar Potentiometers* and *Model 95 Premium Guitar Potentiometers*.

Guitar technicians and designers prefer a longer solder tab for guitar cavities with limited space, and a larger hole to accommodate multiple wire connections. Please see the photos below that show the current style and the new design solder lug washers.

The new design H-127 solder lug washer will begin shipping immediately with all current and new orders. Data sheets for both Model 82 and Model 95 guitar potentiometers have been updated and are available at www.bourns.com/proaudio for your review.
