Design Kits - Panel Controls

Panel controls are designed for applications that typically require frequent adjustment. Both rotary and slide panel control types are available. A selection of elements includes carbon, cermet, and conductive plastic.

These devices are available in various sizes and shaft/bushing combinations. Some models are available with a rotary switch and seal options. Typical applications include audio mixing consoles, test and measurement equipment, consumer electronics, and medical equipment.

In order to obtain a Bourns® Design Kit please contact your local [Bourns sales office or authorized Bourns distributor](#).
