The document posted below contains U.S. Export Control Classification Numbers (ECCNs), at the sub-paragraph level, for various Analog Devices products, as well as their corresponding US and European Union (EU) Harmonized Tariff Schedule (HTS) numbers. ECCN data is important to exporters as these numbers allow an assessment to be made as to whether or not a U.S. export license or an export license issued by another National Government is required prior to executing an export or re-export transaction. HTS data is important for ensuring products are classified in the correct tariff categories, for import purposes, to enable accurate duties and taxes to be assessed and paid by the importing party.

The information shown below is for informational purposes only and is not a representation or warranty regarding the proper classification. All information is provided "as is" and is subject to change without notice. Analog Devices, Inc. (ADI) makes no representation or warranty as to the accuracy or reliability of these classifications. Any use made of the information provided is without recourse to ADI and at the user's risk. ADI is in no way responsible for any damages suffered by the user as a result of using or relying upon such information. ADI encourages users to seek competent legal counsel for advice regarding export and import requirements.
