

# High Performance Switched Capacitor Universal Filter

## FEATURES

- All Filter Parameters *Guaranteed* Over Temperature
- Wide Center Frequency Range (0.1Hz to 40kHz)
- Low Noise, Wide Dynamic Range
- *Guaranteed* Operation for  $\pm 2.37V$  and  $\pm 5V$  Supply
- Low Power Consumption
- *Guaranteed* Clock-to-Center Frequency Accuracy of 0.8%
- *Guaranteed* Low Offset Voltages Over Temperature
- Very Low Center Frequency and Q Tempco
- Clock Input T<sup>2</sup>L or CMOS Compatible
- Separate Highpass (or Notch or Allpass), Bandpass, Lowpass Outputs

## APPLICATIONS

- Sinewave Oscillators
- Sweepable Bandpass/Notch Filters
- Full Audio Frequency Filters
- Tracking Filters

**LT**, LTC and LT are registered trademarks of Linear Technology Corporation.  
 LTCMOS trademark of Linear Technology Corporation.

## DESCRIPTION

The LTC<sup>®</sup>1059 consists of a general purpose, high performance, active filter building block and an uncommitted op amp. The filter building block together with an external clock and 2 to 5 resistors can produce various 2nd order functions which are available at its three output pins. Two out of three always provide lowpass and bandpass functions while the third output pin can produce notch or highpass or allpass. The center frequency of these functions can be tuned from 0.1Hz to 40kHz and is dependent on an external clock or an external clock and a resistor ratio. The filter can handle input frequencies up to 100kHz. The uncommitted op amp can be used to obtain additional allpass and notch functions, for gain adjustment or for cascading techniques.

Higher than 2nd order filter functions can be obtained by cascading the LTC1059 with the LTC1060 dual universal filter or the LTC1061 triple universal filter. Any classical filter realization (such as Butterworth, Causer, Bessel and Chebyshev) can be formed.

The LTC1059 can be operated with single or dual supplies ranging from  $\pm 2.37V$  to  $\pm 8V$  (or 4.74V to 16V single supply).

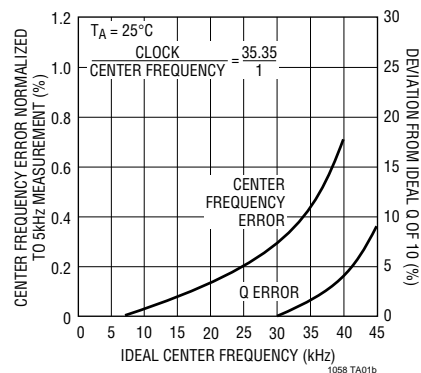

The LTC1059 is manufactured by using Linear Technology's enhanced LTCMOS<sup>™</sup> silicon gate process.

## TYPICAL APPLICATION

Wide Range 2nd Order Bandpass/Notch Filter with Q = 10

Center Frequency and Q Error

## ABSOLUTE MAXIMUM RATINGS

(Note 1)

Supply Voltage .....	18V
Power Dissipation .....	500mW
Operating Temperature Range	
LTC1059C .....	$-40^{\circ}\text{C} \leq T_A \leq 85^{\circ}\text{C}$
LTC1059AM, LTC1059M .....	$-55^{\circ}\text{C} \leq T_A \leq 125^{\circ}\text{C}$
Storage Temperature Range .....	$-65^{\circ}\text{C}$ to $150^{\circ}\text{C}$
Lead Temperature (Soldering, 10 sec).....	300°C

## BLOCK DIAGRAM

## APPLICATIONS INFORMATION

The LTC1059 is compatible with the LTC1060. All the LTC1059 pins are functionally equivalent to the LTC1060 pins bearing the same title. For a detailed pin description and definition of various modes of operation refer to the LTC1060 data sheet. The LTC1059 is typically “faster” than the LTC1060 especially under single 5V (or  $\pm 2.5V$ ) supply

operation. This becomes apparent through the Typical Performance Characteristics of the part. All the graphs shown in this data sheet have been drawn under the same test conditions as in the LTC1060 data sheet; they are also numbered in the same order. For complete discussion of the filter characteristics see the LTC1060 data sheet.

## PACKAGE DESCRIPTION

**J Package**  
**14-Lead CERDIP (Narrow .300 Inch, Hermetic)**  
 (Reference LTC DWG # 05-08-1110)

**OBsolete PACKAGE**

# PACKAGE DESCRIPTION

## N Package 14-Lead PDIP (Narrow .300 Inch) (Reference LTC DWG # 05-08-1510)

NOTE:  
1. DIMENSIONS ARE  $\frac{\text{INCHES}}{\text{MILLIMETERS}}$   
\*THESE DIMENSIONS DO NOT INCLUDE MOLD FLASH OR PROTRUSIONS.  
MOLD FLASH OR PROTRUSIONS SHALL NOT EXCEED .010 INCH (0.254mm)

N14 1002

## S Package 14-Lead Plastic Small Outline (Narrow .150 Inch) (Reference LTC DWG # 05-08-1610)

NOTE:  
1. DIMENSIONS IN  $\frac{\text{INCHES}}{\text{MILLIMETERS}}$   
2. DRAWING NOT TO SCALE  
3. THESE DIMENSIONS DO NOT INCLUDE MOLD FLASH OR PROTRUSIONS.  
MOLD FLASH OR PROTRUSIONS SHALL NOT EXCEED .006" (0.15mm)
