X8R/X8L Dielectric

General Specifications

AVX has developed a range of multilayer ceramic capacitors designed for use in applications up to 150°C. These capacitors are manufactured with an X8R and an X8L dielectric material. X8R material has capacitance variation of \pm 15% between - 55°C and +150°C. The X8L material has capacitance variation of \pm 15% between -55°C to 125°C and +15/-40% from +125°C to +150°C.

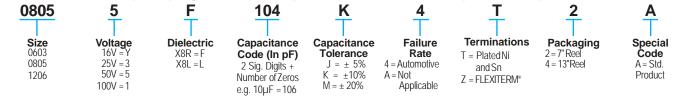

The need for X8R and X8L performance has been driven by customer requirements for parts that operate at elevated temperatures. They provide a highly reliable capacitor with low loss and stable capacitance over temperature.

They are ideal for automotive under the hood sensors, and various industrial applications. Typical industrial application would be drilling monitoring system. They can also be used as bulk capacitors for high temperature camera modules.

Both X8R and X8L dielectric capacitors are automotive AEC-Q200 qualified. Optional termination systems, tin, FLEXITERM® and conductive epoxy for hybrid applications are available. Providing this series with our FLEXITERM® termination system provides further advantage to customers by way of enhanced resistance to both, temperature cycling and mechanical damage.

PART NUMBER (see page 2 for complete part number explanation)

NOTE: Contact factory for availability of Termination and Tolerance Options for Specific Part Numbers.

X8L (Flexiterm Offered)

X8R/X8L Dielectric

General Specifications

APPLICATIONS FOR X8R AND X8L CAPACITORS

- All market sectors with a 150°C requirement
- Automotive on engine applications
- Oil exploration applications
- Hybrid automotive applications
 - Battery control
 - Inverter / converter circuits
 - Motor control applications
 - Water pump
- Hybrid commercial applications
 - Emergency circuits
 - Sensors
 - Temperature regulation

ADVANTAGES OF X8R AND X8L MLC CAPACITORS

- Both ranges are qualified to the highest automotive AEC-Q200 standards
- Excellent reliability compared to other capacitor technologies
- RoHS compliant
- · Low ESR / ESL compared to other technologies
- Tin solder finish
- FLEXITERM® available
- · Epoxy termination for hybrid available
- 100V range available

ENGINEERING TOOLS FOR HIGH VOLTAGE MLC CAPACITORS

- · Samples
- Technical Articles
- Application Engineering
- Application Support

X8R/X8L Dielectric

Specifications and Test Methods

Parame		X8R/X8L Specification Limits	Measuring Conditions			
Operating Tem	perature Range	-55°C to +150°C	Temperature Cycle Chamber			
Čapac	itance	Within specified tolerance		kHz ± 10%		
Dissipation Factor		\leq 2.5% for \geq 50V DC rating \leq 3.5% for 25V DC and 16V DC rating	Voltage: 1.0Vrms ± .2V			
• • • • • • • • • • • • • • • • • • •		\leq 3.5% for 25V DC and 16V DC rating 100,000MΩ or 1000MΩ - μF,	Charge device with rated voltage for			
Insulation I	Resistance	whichever is less	120 ± 5 secs @ room temp/humidity Charge device with 250% of rated voltage for 1-5 seconds, w/charge and discharge current limited to 50 mA(max) Note: Charge device with 150% of rated
