

## General purpose input/output rail-to-rail low-power operational amplifiers

### Pin connections (top view)

### Features

- Operating range  $V_{CC} = 2.5\text{ V to }6\text{ V}$
- Rail-to-rail input and output
- Extended  $V_{icm}$  ( $V_{DD} - 0.2\text{ V to }V_{CC} + 0.2\text{ V}$ )
- Capable of driving a  $32\ \Omega$  load resistor
- High stability:  $500\text{ pF}$
- Operating temperature range:  $-40\text{ to }125\text{ }^\circ\text{C}$

### Applications

- Battery powered applications
- Audio driver (headphone driver)
- Sensor signal conditioning
- Laptop/notebook computers

### Description

The TSV358, TSV358A, TSV324, and TSV324A (dual and quad) devices are low voltage versions of the LM358 and LM324 commodity operational amplifiers. The TSV321 and TSV321A are the single version. All devices operate with voltages as low as 2.5 V and feature both I/O rail-to-rail.

The common mode input voltage extends 200 mV beyond the supply voltages at 25 °C while the output voltage swing is within 100 mV of each rail with a  $600\ \Omega$  load resistor. At  $V_{CC} = 3\text{ V}$ , these devices offer 1.3 MHz of gain bandwidth product and provide high output current capability with a typical value of 80 mA.

These features make the TSV3xx and TSV3xxA family ideal for active filters, general purpose low voltage applications, and general purpose portable devices.

		SO8	40	
		MiniSO8	39	
		TSSOP8	37	
		SO14	31	
		TSSOP14	32	
ESD	HBM: human body model <sup>(4)</sup>	2	kV	
	MM: machine model <sup>(5)</sup>	200	V	
	CDM: charged device model <sup>(6)</sup>	1.5	kV	
	Latch-up immunity	200	mA	
	Lead temperature (soldering, 10 s)	250	°C	
	Output short-circuit duration	See <sup>(7)</sup>		

- All voltage values, except the differential voltage are with respect to the network terminal.
- The differential voltage is the non-inverting input terminal with respect to the inverting input terminal. If  $V_{id} > \pm 1$  V, the maximum input current must not exceed  $\pm 1$  mA. When  $V_{id} > \pm 1$  V, an input series resistor must be added to limit input current.
- Short-circuits can cause excessive heating and destructive dissipation.  $R_{th}$  are typical values.
- Human body model: 100 pF discharged through a 1.5 k $\Omega$  resistor between two pins of the device, done for all couples of pin combinations with other pins floating.
- Machine model: a 200 pF capacitor is charged to the specified voltage, then discharged directly between two pins of the device with no external series resistor (internal resistor < 5  $\Omega$ ), done for all couples of pin combinations with other pins floating.
- Charged device model: all pins plus package are charged together to the specified voltage and then discharged directly to ground.
- Short-circuits from the output to  $V_{CC}$  can cause excessive heating. The maximum output current is approximately 80 mA, independent of the magnitude of  $V_{CC}$ . Destructive dissipation can result from simultaneous short-circuits on all amplifiers.

Table 2. Operating conditions

Symbol	Parameter	Value	Unit
$V_{CC}$	Supply voltage	2.5 to 6	V
$V_{icm}$	Common mode input voltage range	$T_{amb} = 25\text{ }^{\circ}\text{C}, 2.5 \leq V_{CC} \leq 6\text{ V}$	$V_{DD} - 0.2\text{ to } V_{CC} + 0.2$
		$T_{min} < T_{amb} < T_{max}, 2.5 \leq V_{CC} \leq 5.5\text{ V}$	$V_{DD}\text{ to } V_{CC}$
$T_{oper}$	Operating free air temperature range	-40 to + 125	$^{\circ}\text{C}$

1. Qualified and characterized according to AEC Q100 and Q003 or equivalent, advanced screening according to AEC Q001 & Q 002 or equivalent.

## Revision history

**Table 12. Document revision history**

Date	Revision	Changes
2-Aug-2005	1	First release - Products in full production.
20-Sep-2005	2	Addition of TS321A/TS324A/TS358A data in tables in Section 2: "Electrical characteristics". Minor formatting and grammatical changes.
7-Dec-2005	3	Missing PPAP references inserted see Section 4: "Ordering information".
28-Jun-2007	4	Correction made on output drive capability, 80 mA in description on cover page. SVR measurement conditions inserted in electrical characteristics tables. Offset voltage limit in temperature added in Section 2: "Electrical characteristics". Correction made on Input Bias Current typical value in Section 2: "Electrical characteristics". Captions of electrical characteristics figures updated. Automotive grade order codes added to Section 4: "Ordering information".
21-Feb-2008	5	Corrected SO-14 $R_{thja}$ value to 105 °C/W. Updated presentation of package information. Corrected footnote for automotive grade order codes in order code table.
13-Sep-2012	6	Updated Features (added SO-8, SO-14, TSSOP8, TSSOP14, and MiniSO-8 package). Updated "Pin connection" figure on page 1 (removed part numbers). Removed TSV321ID, TSV321AID, TSV321YDT, TSV358ID, TSV358AID, TSV324ID, TSV324AID, TSV321YD, TSV358YD, TSV358AIYD, TSV321YD, TSV324YD, and TSV324AIYD order code from Table 11: "Order codes". Qualified status of TSV324AIYPT, TSV324IYPT, TSV324YDT, TSV324AIYDT, TSV358YDT, TSV321RIYLT, TSV321RAIYLT, and TSV358AIYDT order code in Table 11: "Order codes". Updated ECOPACK text in Section 3: "Package information". Minor corrections throughout document.
16-Aug-2013	7	Updated Features Added Related products Table 3 and Table 4: replaced $\Delta V_{io}$ with $\Delta V_{io}/\Delta T$ Table 11: "Order codes": order code TSV321IDT renamed TSV321AIDT, added order code TSV358AIDT, updated footnote associated with order codes TSV358IYPT and TSV358AIYPT.
27-JUN-2014	8	Added part numbers TSV321A, TSV358A, and TSV324A. Table 6: "SO8 package mechanical data": added L1 dimensions Table 11: "Order codes": removed "tube" from all packaging Updated disclaimer
24-Nov-2021	9	Updated Table 11. Order codes.
