## MC74LCX125

## Low-Voltage CMOS Quad Buffer

## With 5 V-Tolerant Inputs and Outputs (3-State, Non-Inverting)

The MC74LCX125 is a high performance, non-inverting quad buffer operating from a 2.3 to 3.6 V supply. High impedance TTL compatible inputs significantly reduce current loading to input drivers while TTL compatible outputs offer improved switching noise performance. A $\mathrm{V}_{\mathrm{I}}$ specification of 5.5 V allows MC74LCX125 inputs to be safely driven from 5.0 V devices. The MC74LCX125 is suitable for memory address driving and all TTL level bus oriented transceiver applications.

Current drive capability is 24 mA at the outputs. The Output Enable ( $\overline{\mathrm{OE}}$ ) inputs, when HIGH, disable the outputs by placing them in a HIGH Z condition.

## Features

- Designed for 2.3 to $3.6 \mathrm{~V} \mathrm{~V}_{\mathrm{CC}}$ Operation
- 5.0 V Tolerant - Interface Capability With 5.0 V TTL Logic
- Supports Live Insertion and Withdrawal
- $I_{\mathrm{OFF}}$ Specification Guarantees High Impedance When $\mathrm{V}_{\mathrm{CC}}=0 \mathrm{~V}$
- LVTTL Compatible
- LVCMOS Compatible
- 24 mA Balanced Output Sink and Source Capability
- Near Zero Static Supply Current in all Three Logic States (10 $\mu \mathrm{A}$ ) Substantially Reduces System Power Requirements
- Latchup Performance Exceeds 500 mA
- ESD Performance: Human Body Model >2000 V Machine Model >200 V
- $\mathrm{Pb}-$ Free Packages are Available*

[^0]See detailed ordering and shipping information in the package dimensions section on page 4 of this data sheet.

| $\mathrm{~T}_{\text {STG }}$ | Storage Temperature Range | -65 to +150 |  | ${ }^{\circ} \mathrm{C}$ |

Maximum ratings are those values beyond which device damage can occur. Maximum ratings applied to the device are individual stress limit values (not normal operating conditions) and are not valid simultaneously. If these limits are exceeded, device functional operation is not implied, damage may occur and reliability may be affected.

1. $\mathrm{I}_{\mathrm{O}}$ absolute maximum rating must be observed.

RECOMMENDED OPERATING CONDITIONS
