1. APPLICATION

25W Platform LED Module is designed as a core component in **Modular Platform Engine Series** for street light and flood light application. This document especially specifies **25W Platform LED Module with Fin**, generally recommended for luminaires with insufficient thermal management by the fixture itself.

1-1 Modular Platform Engine

Modular Platform Engine is composed of **25W Platform LED Module**, **25/50/75/100/150W LED Driver**, and **Distributor Harness**.

1-1-1 25W Platform LED Module

There are two different types of heat sink designs for 25W Platform LED Module, intended for thermal management either by engine or by fixture.

This document especially specifies **25W Platform LED Module with Fin for thermal management by Engine**.

(a) Module with Fin
[Thermal management by Engine]

(b) Module without Fin
[Thermal management by Fixture]

1-1-2 LED Driver

(a) 25/50/75W Driver

(b) 100/150W Driver

1-1-3 Distributor Harness

Distributor harnesses are available to feed current to various number of LED modules by using one or two channel output from LED Driver.

1-2 Modular Platform Engine Series

Typical operating current for one module is set at 700mA, which allows lumen output increment by **1450lm(nominal value)** depending on the number of LED modules.

1-2-1 Lumen Packages with LED Driver(Engine : 58lm/W)

※ **vv** : Remark of the LED Driver (TD,00: Basic Model, 01,02,03: Derivation Model)

1-2-2 Current Distribution across Modules

Current per module can vary depending on the Vf distribution of modules in parallel, deviating from the nominal operating current(700mA). The Vf distribution of modules is tightly controlled to achieve uniform driving currents.

<p>※ The power consumption for a specific module is dependent on the operating voltage distribution across the modules in parallel connection. The maximum operating current means the highest limit in any operating condition.</p> <p>※ Voltage difference between modules are tightly controlled to be less than 1.0V so that the maximum current of any module can be limited to 850mA. Voltage bins of modules will be designated on the module label and box label, described in Electrical Application Notes.</p> <p>※ Safety and wiring information will be described in Electrical Application Notes.</p>
