Description

The UA1L30VM Amplifier is a general-purpose broadband amplifier designed for microwave communications, test equipment, and military systems. Its small size and exceptional performance make it a versatile gain block which can improve power and gain in a single package potentially replacing 2 or 3 narrower band amplifiers.

The UA1L30VM provides a complete amplifier module package with a wide frequency range of 1GHz to 30 GHz, low power dissipation, ample output power, low noise figure and gain control.

Key Specifications (Specifications pertain to measurements @ 25°C)
