

TO220-3 / TO263-3 Voltage Regulator Evaluation Board [Buy Now](#)

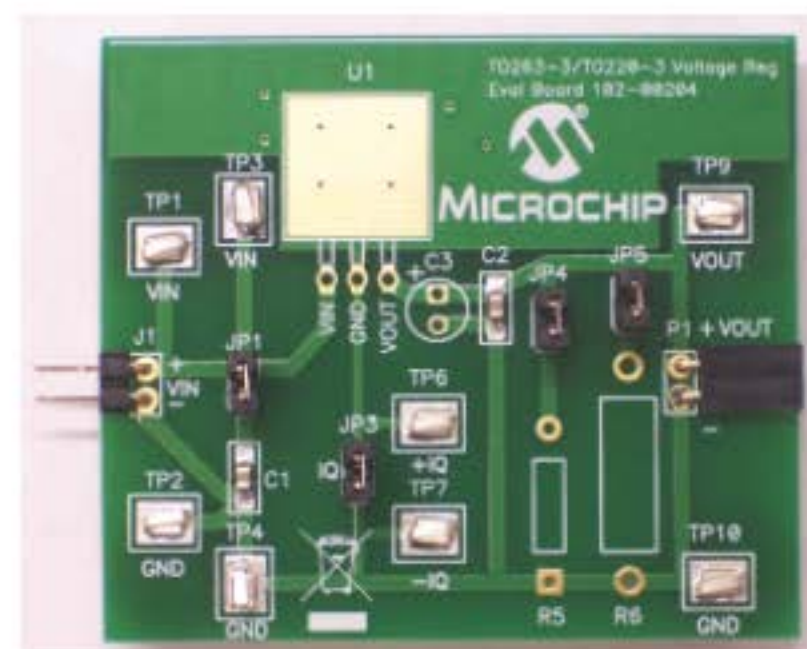

Part Number: TO263-3EV-VREG

[Documentation & Software](#)

The TO220-3 / TO263-3 Voltage Regulator Evaluation Board is designed to provide functional evaluation of Microchip Voltage Regulators that utilize the TO220-3 and TO263-3 package.

The TO220-3 / TO263-3 Voltage Regulator Evaluation Board does not come with a voltage regulator soldered onto the board. This allows the user to attach the voltage regulator of their choosing to the board and perform quiescent current, ground current, PSRR, and other desired tests.

Features [Package Contents](#)

- Selectable Load Resistance
- Ground Current and Quiescent Current Measurement
- Line Step Measurement
- Load Step Measurement
- Power Supply Rejection Ratio (PSRR) Measurement
