## T4DSYS-006 - Picadillo-35T Display Module with Resistive Touch

**BUY  
IT NOW**

Part Number: T4DSYS-006

Share

The Picadillo-35T is a 3.5" 320x480 resolution (Half VGA) Embedded Display Module with Resistive Touch, featuring the Microchip PIC32MX795F512L 32-bit microcontroller and Arduino™/ chipKIT™ style headers for easy attachment of shields, and compatible with UECIDE, MPIDE and MPLAB X Programming IDEs, making this a brilliant display solution with open-source software.

### Features

- On-board microSD connector
- On-board audio amplifier and speaker
- RTC oscillator
- Headers in the layout of chipKIT Uno32
