

MCP19035 Power Module 8A Evaluation Board

Part Number: ADM00987

Summary:

The PM8 module is a compact solution, highly efficient, step-down voltage converter that will convert the input voltage rail (typically 12V) to 5V regulated output voltage. The maximum output current for this step-down converter is 8A. The board demonstrates the capabilities of the MCP19035 600 kHz Synchronous Buck Converter Controller in a typical step-down application. The reference design can
