Part Number EVB-LAN9221-MINI - LAN9221 High-Performance 16-bit 10/100 Ethernet Controller Customer Evaluation B

The LAN9221 is a full-featured, High-Performance, single-chip 10/100 Ethernet controller designed for embedded applications where performance, flexibility, ease of integration and system cost control are required. The LAN9221 includes an integrated Ethernet MAC and PHY with a high-performance SRAM-like slave interface. The simple, yet highly functional host bus interface provides a glue-less connection to most common 16-bit microprocessors and microcontrollers. This MINI board enables developers to connect directly to a host bus via a standard connector. **(Not Returnable/Cancelable)**
